Everyday Agri-Environmental Governance Jérémie Forney, Dana Bentia, Angga Dwiartama, 2024-07-05 Revitalising the way the social sciences question agri environmental governance this book introduces the everyday governance approach as a means to improving the sustainability of agriculture and food systems The everyday refers to localised practices specific networks and practical norms that emerge in a process of interaction translation and reinterpretation The authors build this approach on assemblage thinking and theory which focuses on the collective production of the social through complex sets of connections For this reason assemblage thinking becomes a particularly productive guide in exploring how everyday governance is co produced in the interaction between numerous social processes involving a diversity of actors and instruments The authors navigate between original and contrasting case studies from Switzerland Indonesia and the European Union in order to reorient attention to the transformative nature of governance which they locate along four different dimensions of the everyday 1 the interdependence of instruments within a wider governance assemblage 2 the uncertainty and unpredictability of effects in agri environmental governance 3 the distributed nature of agency and its implication for power relations 4 the importance of capacities in the transformation of agri food systems This book calls for a redesigning of agri environmental governance that should move away from the setting of fix and precise objectives and solutions and rather aim for a consolidation of sound foundations on which desirable futures can emerge The book will be an essential read for students and scholars interested in sustainable agriculture and food systems governance modes and approaches and sustainability more broadly The Open Access version of this book available at www.taylorfrancis.com has

Decentralization in Environmental Governance Christian Zuidema, 2016-10-04 Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how governance renewable might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions It does so by revitalizing the idea that we can contingently relate alternative planning approaches to the circumstances encountered It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty complexity and socially constructed knowledge This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance Next to its theoretical ambitions Decentralization in Environmental Governance is practical in offering a constructive critique on current processes of governance renewal in European environmental governance
