Gombrich,1994-01-01 In the fourth and concluding volume of his classic series of essays on the Renaissance Ernst Gombrich focuses mainly on individual artists with illuminating studies of the works of some of the greatest masters Giotto Leonardo da Vinci Raphael Giulio Romano and Michelangelo With the originality of mind and lucidity of expression that are his hallmarks he re examines texts and documents in order to throw new light on familiar works Undogmatic in their approach to methods of inquiry and demonstrating a profound concern with the standards and values of our cultural heritage these essays are not only models of good art historical writing but they also represent a vitally important humanistic tradition in scholarship and criticism      **New Light on Old Masters** Ernst H. Important Old Masters in a New Light ,2009      *Painting Materials* R. J. Gettens,G. L. Stout,2012-09-26 The combined training and experience of the authors of this classic in the varied activities of painting conservation cultural research chemistry physics and paint technology ideally suited them to the task they attempted Their book written when they were both affiliated with the Department of Conservation at Harvard s Fogg Art Museum is not a handbook of instruction It is instead an encyclopedic collection of specialized data on every aspect of painting and painting research The book is divided into five sections Mediums Adhesives and Film Substances amber beeswax casein cellulose nitrate dragon s blood egg tempera paraffin lacquer gum Arabic Strasbourg turpentine water glass etc Pigments and Inert Materials over 100 entries from alizarin to zinnobor green Solvents Diluents and Detergents acetone ammonia carbon tetrachloride soap water etc Supports academy board dozens of different woods esparto grass gesso glass leather plaster silk vellum etc and Tools and Equipment Coverage within each section is exhaustive Thirteen pages are devoted to items related to linseed oil eleven to the history and physical and chemical properties of pigments two to artificial ultramarine blue eleven to wood and so on with hundreds of entries Much of the information physical behavior earliest known use chemical composition history of synthesis refractive index etc is difficult to find elsewhere The rest was drawn from such a wide range of fields and from such a long span of time that the book was immediately hailed as the best organized most accessible work of its kind That reputation hasn t changed The author s new preface lists some recent discoveries regarding pigments and other materials and the pigment composition chart has been revised but the text remains essentially unchanged It is still invaluable not only for museum curators and conservators for whom it was designed but for painters themselves and for teachers and students as well      **A New Light of Mysticism** Arthur Edward Waite,1893      At the Dawn of a New Consciousness Bernard

Nesfield-Cookson,2010 The Italian Renaissance is considered by many to mark the beginning of the modern age The name itself literally rebirth accurately expresses the innovation that took place during that period Renaissance thinkers took a vital interest in history literature and the arts focusing on the human world as much as if not more than that of God The rapid development of the arts and sciences reflected their study of the visible physical world in all its three dimensional glory The source of these new impulses says the author can be found in what Rudolf Steiner calls the birth of the consciousness soul the faculty for objective self awareness Instead of a primarily inward looking consciousness people began looking outward with greater intensity observing the world around them in detail With greater conscious of their separate being people of the Renaissance began to study the phenomena of the world of nature from an individual personal perspective In this enlightening book illustrated with sixteen pages of color plates the author illuminates the concept of the consciousness soul showing how it is reflected in fifteenth century Florentine painting sculpture and architecture as well as in the impulses issuing from Plato s Academy of Athens

Old Masters Worldwide Susanna Avery-Quash,Barbara Pezzini,2020-10-15 As a result of the Napoleonic wars vast numbers of Old Master paintings were released on to the market from public and private collections across continental Europe The knock on effect was the

growth of the market for Old Masters from the 1790s up to the early 1930s when the Great Depression put an end to its expansion. This book explores the global movement of Old Master paintings and investigates some of the changes in the art market that took place as a result of this new interest. Arguably the most important phenomenon was the diminishing of the traditional figure of the art agent and the rise of more visible increasingly professional dealerships firms such as Colnaghi and Agnew s in Britain Goupil in France and Knoedler in the USA came into existence. Old Masters Worldwide explores the ways in which the pioneering practices of such businesses contributed to shape a changing market. The New Volumes of the Encyclopædia Britannica, 1902 *Disguise, Deception, Trompe-l'oeil* Leslie Anne Boldt-Irons, Corrado Federici, Ernesto Virgulti, 2009. The series is designed to advance the publication of research pertaining to themes and motifs in literature. The studies cover cross cultural patterns as well as the entire range of national literatures. They trace the development and use of themes and motifs over extended periods elucidate the significance of specific themes or motifs for the formation of period styles and analyze the unique structural function of themes and motifs.
