A Global History of Modern Historiography Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures

Logics of History William H. Sewell Jr., 2009-07-27 While social scientists and historians have been exchanging ideas for a long time they have never developed a proper dialogue about social theory William H Sewell Jr observes that on questions of theory the communication has been mostly one way from social science to history Logics of History argues that both history and the social sciences have something crucial to offer each other While historians do not think of themselves as theorists they know something social scientists do not how to think about the temporalities of social life On the other hand while social scientists treatments of temporality are usually clumsy their theoretical sophistication and

penchant for structural accounts of social life could offer much to historians Renowned for his work at the crossroads of history sociology political science and anthropology Sewell argues that only by combining a more sophisticated understanding of historical time with a concern for larger theoretical questions can a satisfying social theory emerge In *Logics of History* he reveals the shape such an engagement could take some of the topics it could illuminate and how it might affect both sides of the disciplinary divide

The Last Ghetto Anna Hájková, 2020-11-05 Terezín as it was known in Czech or Theresienstadt as it was known in German was operated by the Nazis between November 1941 and May 1945 as a transit ghetto for Central and Western European Jews before their deportation for murder in the East Terezín was the last ghetto to be liberated one day after the end of World War II The Last Ghetto is the first in depth analytical history of a prison society during the Holocaust Rather than depict the prison society which existed within the ghetto as an exceptional one unique in kind and not understandable by normal analytical methods Anna Hájková argues that such prison societies that developed during the Holocaust are best understood as simply other instances of the societies human beings create under normal circumstances Challenging conventional claims of Holocaust exceptionalism Hájková insists instead that we ought to view the Holocaust with the same analytical tools as other historical events The prison society of Terezín produced its own social hierarchies under which seemingly small differences among prisoners of age ethnicity or previous occupation could determine whether one ultimately lived or died During the three and a half years of the camp s existence prisoners created their own culture and habits bonded fell in love and forged new families Based on extensive archival research in nine languages and on empathetic reading of victim testimonies The Last Ghetto is a transnational cultural social gender and organizational history of Terezín revealing how human society works in extremis and highlighting the key issues of responsibility agency and its boundaries and belonging

Scholarly Self-Fashioning and Community in the Early Modern University Richard Kirwan, 2016-04-01 A greater fluidity in social relations and hierarchies was experienced across Europe in the early modern period a consequence of the major political and religious upheavals of the sixteenth and seventeenth centuries At the same time the universities of Europe became increasingly orientated towards serving the territorial state guided by a humanistic approach to learning which stressed its social and political utility It was in these contexts that the notion of the scholar as a distinct social category gained a foothold and the status of the scholarly group as a social elite was firmly established University scholars demonstrated a great energy when characterizing

themselves socially as learned men This book investigates the significance and implications of academic self fashioning throughout Europe in the early modern period It describes a general and growing deliberation in the fashioning of individual communal and categorical academic identity in this period It explores the reasons for this growing self consciousness among scholars and the effects of its expression social and political desired and real *Handbook of Historical Sociology* Gerard Delanty, Engin F Isin, 2003-06-03 The overall conception of the volume is absolutely splendid and the editors skilfully place the material in the context of disciplinary and post disciplinary developments in sociology This is a major contribution to the field as well as a comprehensive and reliable guide to its main components William Outhwaite Professor of Sociology School of European Studies University of Sussex It is hard to think of anything that has been left out in this masterly survey of contemporary historical sociology The editors have done a superb job in the selection of both themes and contributors We now at last have an up to date book to assign in our graduate courses on comparative historical sociology There s really nothing else like it out there The editors introduction is one of the best things I have read on how the field developed and the problems it has encountered Krishan Kumar William R Kenan Jr Professor of Sociology University of Virginia The range of topics covered and the number of distinguished scholars who have contributed to the handbook is impressive with leading figures such as Bryan S Turner John R Hall Gianfranco Poggi and Craig Calhoun among the contributors to a book that covers areas as diverse as post colonial historiography and the historical sociology of the city the handbook fills a void within the sizable literature on historical sociology and undoubtedly will be a useful addition to graduate reading lists The British Journal of Sociology What is important in historical sociology What are the main routes of development in the subject This Handbook consists of 26 chapters on historical sociology It is divided into three parts Part One is devoted to Foundations and covers Marx Weber evolutionary and functionalist approaches the Annales School Elias Nelson and Eisenstadt Part Two moves on to consider major approaches such as modernization approaches late Marxist approaches historical geography institutional approaches cultural history intellectual history postcolonial and genealogical approaches The third part is devoted to the major substantive themes in historical sociology ranging from state formation nationalism social movements classes patriarchy architecture religion and moral regulation to problems of periodization and East West divisions Each part includes an introduction that summarizes and contextualizes chapters A general introduction to the volume outlines the current situation of historical sociology after the cultural turn in the social sciences It argues that historical sociology is deeply divided between explanatory sociological approaches and more empirical and interpretative historical approaches Systematic and informative the book offers readers the most complete and authoritative guide to historical sociology
