Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d'être of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others

Confronting Equity Issues on Campus Estela Mara Bensimon, Lindsey Malcom, 2023-07-03 How can it be that 50 years after the passage of the Civil Rights Act our institutions of higher education have still not found ways of reducing the higher education gaps for racial and ethnic groups That is the question that informs and animates the Equity

Scorecard model of organizational change It shifts institutions focus from what students do or fail to do to what institutions can do through their practices and structures as well as the actions of their leaders and faculty to produce equity in outcomes for racially marginalized populations Drawing on the theory of action research it creates a structure for practitioners to become investigators of their own institutional culture to become aware of racial disparities confront their own practices and learn how things are done on their own turf to ask In what ways am I contributing to equity inequity The Equity Scorecard model differs significantly from traditional approaches to effecting change by creating institutional teams to examine and discuss internal data about student outcomes disaggregated by race and ethnicity The premise of the project is that institutional data acts as a powerful trigger for group learning about inequities in educational outcomes and that the likelihood of improving those outcomes increases if the focus is on those things within the immediate control of the participating leaders and practitioners Numerous institutions have successfully used The Equity Scorecard s data tools and processes of self reflection to uncover and document the behaviors and structures that lead to failure to retain and graduate students from diverse racial and ethnic backgrounds with a history of unequal opportunity and to create the climate for faculty and staff to take ownership of the issues and develop sustainable practices to eliminate racial disparities in academic performance The Scorecard can be used at a small scale to analyze individual courses or programs as well as broader institutional issues This book presents the underlying concept of funds of knowledge for race conscious expertise that informs this process describes its underlying theories defines the attributes needed to achieve equity minded practice demonstrates through examples of implementation what different institutions have learned and what they have achieved and provides a blueprint for action for higher education as a whole For college leaders instructors and support staff who feel the pressure moral or otherwise to close the racial equity gap that their institutions produce year after year this book provides the structure knowledge and tools to do so It is also of value to scholars and students of higher education who have an interest in the study of organizational change
