Crisp, Michael C. Rea, 2009-02-13

Philosophy in the English speaking world is dominated by analytic approaches to its problems and projects but theology has been dominated by alternative approaches Many would say that the current state in theology is not mere historical accident but is rather how things ought to be On the other hand many others would say precisely the opposite that theology as a discipline has been beguiled and taken captive by continental approaches and that the effects on the discipline have been largely deleterious The methodological divide between systematic theologians and analytic philosophers of religion is ripe for exploration The present volume represents an attempt to begin a much needed interdisciplinary conversation about the value of analytic philosophical approaches to theological topics Most of the essays herein are sympathetic toward the enterprise the editors are calling analytic theology but with an eye toward balance the volume also includes essays and an introduction that try to offer more critical perspectives on analytic theology **God and the Ethics of Belief** Andrew Dole, Andrew Chignell, 2005-06-06

Philosophy of religion in the Anglo American tradition experienced a rebirth following the 1955 publication of *New Essays in Philosophical Theology* eds Antony Flew and Alisdair MacIntyre Fifty years later this volume of essays offers a sampling of the best work in what is now a very active field written by some of its most prominent members A substantial introduction sketches the developments of the last half century while also describing the ethics of belief debate in epistemology and showing how it connects to explicitly religious concerns and to the topics of the individual contributions These topics include the relationship between God and the natural laws the metaphysics of bodily resurrection the role of appeal to mystery in the religious life the justification of both theistic belief generally and more specific doctrinal beliefs and the social political aspects of religious faith and practice **In Search of the Divine** Joseph Mathew, 2010 **Models of God and Alternative Ultimate Realities** Jeanine Diller, Asa Kasher, 2013-06-13

The envisioned volume is a collection of recent essays about the philosophical exploration critique and comparison of a the major philosophical models of God gods and other ultimate realities implicit in the world s philosophical schools and religions and of b the ideas of such models and doing such modeling per se The aim is to identify exactly what a model of ultimate reality is create a comprehensive and accessible collection of extant models and determine how best philosophically to model ultimate reality if possible and

desirable *Essays in Analytic Theology* Michael C. Rea, 2020-12-10 This book is the second of two volumes collecting together Michael C Rea's most substantial work in analytic theology The first volume focuses on the nature of God and our ability to talk and discover truths about God whereas this volume contains essays focused more on questions about humanity the human condition and how human beings relate to God Part one of Volume II considers on the doctrines of the incarnation original sin and atonement Part two examines the problem of evil the problem of divine hiddenness and a theological problem that arises in connection with the idea God not only tolerates but validates a response of angry protest in the face of these problems Exploring Theological Paradoxes Cyril Orji, 2022-08-31 This book focuses on the question of theological paradox exploring what it means and its place in theological method from a Christian perspective Just as paradoxes are unavoidable in logic and mathematics paradoxes are inevitable in religious and theological discourses The chapters in this volume examine a number of cases including the Red Heifer paradox the liar paradox and the paradox of omnipotence and attention is given to Christian doctrines such as the Trinity and the Incarnation Arguing for a renewed understanding and appreciation of the role of paradox this study will be of interest to scholars of theology and the philosophy of religion A Dictionary of Philosophy of Religion Charles Taliaferro, 2010-08-19 A Dictionary of Philosophy of Religion is an indispensable resource for students and scholars Covering historical and contemporary figures arguments and terms it offers an overview of the vital themes that make philosophy of religion the growing vigorous field that it is today It covers world religions and sources from east and west Entries have been crafted for clarity succinctness and engagement Named a Choice Outstanding Academic Title 2011 **Divine Agency and Divine Action, Volume I** William J. Abraham, 2017-10-27 Divine Agency and Divine Action Volume I lays the groundwork for a constructive contribution to the contemporary debate regarding divine action Noted scholar William J Abraham argues that the concept of divine action is not a closed concept like knowledge but an open concept with a variety of context dependent meanings The volume charts the history of debate about divine action among key Anglophone philosophers of religion and observes that they were largely committed to this erroneous understanding of divine action as a closed concept After developing an argument that divine action should be understood as an open fluid concept Abraham engages the work of William Alston Process metaphysics quantum physics analytic Thomist philosophy of religion and the theology of Kathryn Tanner Abraham argues that divine action as an open concept must be shaped by distinctly theological considerations and thus all future work on divine action among philosophers of religion must change to accord with this vision Only deep engagement with the Christian theological tradition will remedy the problems ailing contemporary discourse on divine action Philosophy of Religion C. Stephen Evans, 1985-01-01 C Stephen Evans examines the central themes of philosophy of religion including the arguments for God's existence the meaning of revelation and miracles and the problem of religious language *Understanding Pannenberg* Anthony C. Thiselton, 2018-06-01 Wolfhart Pannenberg has forever changed the face of twentieth century theology His book on Christology constituted a turning point away from

Bultmann's existentialist theology and convincingly vindicated belief in the bodily resurrection of Jesus and its importance for theology. His numerous other works especially his Systematic Theology, Theological Anthropology and Theology and the Philosophy of Science show both depth of learning and an unsurpassed and enviable range of interests. This book aims to explain the vast scope of Pannenberg's thought, his understanding of the sovereignty and majesty of the God as the God of all reality, not only Israel and the church who also revealed himself in Jesus Christ. Jesus is not simply the pre-resurrection Jesus of many Gospel narratives but the raised and exalted Christ of the whole New Testament. Pannenberg shines a light on the centrality of futurity and of the whole of reality in God's purposes. Meaning becomes clear in the light of the whole as his hermeneutics explains. He expounds the role of God as Trinity and the Holy Spirit. His vision of God and the whole world is breath-taking and often heartening and practical.

Beyond Realism: Seeking the Divine Other Simon Smith, 2018-01-15

The meaning of God-talk remains the fundamental issue facing religious thinkers today. This study concerns the analogies needed to make sense of that talk. Embracing those analogies signals the application of Austin Farrer's cutting-edge theology. Almost fifty years after his death, Farrer remains one of the twentieth century's last great metaphysical minds; his grasp of faith and philosophy unequalled. Having defended religious thought against both Positivist and Process reduction, he pursued his own revision of scholastic tradition, ultimately developing the vital corrective to an overweening impersonalism, one which depersonalises the divine so severs the cosmological connection. Following this course returns us to an earlier tradition, to a metaphysic of persons exemplified in the expressions of lived faith. This draws upon the logic of personal identity: what it means to be or rather to become a person. Hence, journey's end lies in a Feuerbachian anthropology of theology or anthropotheism. Like Farrer, Feuerbach used the believer's language to relocate theology and philosophy within a framework that makes fertile use of anthropomorphic personifications to think God. Revisiting the personalist presuppositions of metaphysics in this way throws light on the most vital questions of personal identity. To answer them is to draw reality on a grander scale than either realism or consequentialism is capable of. Most importantly, it is to locate our place within that image. Doing theology dynamically or psychologically informed as both Farrer and Feuerbach insisted means recognising the constitutive role such images play in self-construction. Without active participation in our ideals and aspirations, we cannot become persons at all; participation entails the enactment of our prospective selves. This returns us to the practice of piety, faith in a Godly person. Here we find the reconstruction of Feuerbach's anthropology as applied theology and, by extension, or amplification, the completion of Farrer's personalist metaphysics.

Creation, Evolution and Meaning Robin

Attfield, 2018-07-17 This book presents the case for belief in both creation and evolution at the same time as rejecting creationism. Issues of meaning supply the context of inquiry; the book defends the meaningfulness of language about God and also relates belief in both creation and evolution to the meaning of life. Meaning, it claims, can be found in consciously adopting the role of stewards of the planetary biosphere and thus of the fruits of creation. Distinctive features include a

sustained case for a realist understanding of language about God a contemporary defence of some of the arguments for belief in God and in creation a sifting of different versions of Darwinism and their implications for religious belief a Darwinian account of the relation of predation and other apparent evils to creation a new presentation of the argument from the world's value to the purposiveness of evolution and discussions of whether or not meaning itself evolves and of religious and secular bases for belief in stewardship
