New Form Of Warfare The Rise Of Nonlethal Weapons:

A New Form of Warfare Malcolm Dando, 1996 Today's industrialised powers wish to deploy military forces in peacekeeping operations without incurring or causing casualties But Dando argues that the deployment of non lethal weapons could raise many difficult questions and bring new forms of warfare *The Future of Non-lethal Weapons* Nick Lower, 2017-09-29 These essays explore the increase in interest in non lethal weapons Such devices have meant that many armed forces and law enforcement agencies are able to act against undesirables without being accused of acting in an inhumane way Topics for discussion in this volume include an overview of the future of non lethal weapons emerging non lethal technologies military and police operational deployment of non lethal weapons a scientific evaluation of the effectiveness of non lethal weapons changes in international law needed to take into account non lethal technologies developments in genomics leading to new chemical incapacitants implications for arms control and proliferation the role of non lethal weapons in human rights abuses conceptual theoretical and analytical perspectives on the nature of non lethal weapons development *Professional Journal of the United States Army*, 1998 **Armed conflict in the 21st century** Steven Metz, 2000 **Armed Conflict in the 21st Century** Steven Metz, 2000 [Armed Conflict in the 21st Century: The Information Revolution and Post-Modern Warfare](#), **Deadly Cultures** Mark Wheelis, Lajos Rózsa, 2009-06-30 The threat of biological weapons has never attracted as much public attention as in the past five years Yet there has been little historical analysis of such weapons over the past half century Deadly Cultures sets out to fill this gap by analyzing the historical developments since 1945 and addressing three central issues why states have continued or begun programs for acquiring biological weapons why states have terminated biological weapons programs and how states have demonstrated that they have truly terminated their biological weapons programs *Military Review*, 1998 **The Politics of Emerging and Resurgent Infectious Diseases** Jim Whitman, 2000-07-24 HIV AIDS is but one of a number of new and deadly diseases which threaten communities throughout the world Together with the resurgence of diseases once thought to have been conquered the human costs and social implications have begun to engage a diverse range of practitioners and scholars The premise behind this collection of distinguished essays is that the causal relations impacts and consequences of this disturbing trend are as much political as medical or scientific This book is an excellent introduction to a field of growing importance *The Changing Face of Conflict and the Efficacy of International Humanitarian Law* Helen Durham, Timothy L.H. McCormack, 2022-10-31 It is indisputable that the way armed conflict is conducted has changed dramatically in the last half of the twentieth century The contributions to this volume accept the reality of these changes and seek to assess the efficacy of certain aspects of international humanitarian law The volume commences with a critical evaluation of the 1977 Protocols additional to the four Geneva Conventions of 1949 Subsequent chapters consider increasing protection for women and minorities in armed conflict efforts to control the weapons of war identifying the law applicable to peace operations and

current developments in the enforcement of international humanitarian law One general theme which emerges from a number of chapters is the importance of the relationship between international humanitarian law and other relevant areas of international law Most of the contributors also applaud recent developments towards effective enforcement of the established principles of this important area of international law Controlling Biochemical Weapons A. Kelle, K. Nixdorff, M. Dando, 2006-05-26 Scientific and technological is currently transforming the problem of preventing biological warfare and biological terrorism Examples from the areas of immunology the neurosciences and the neuroendocrine immune system are used to show the magnitude of the problem The book outlines the measures required to control biochemical weapons today

Protection of Children During Armed Political Conflict Charles W. Greenbaum, Philip E. Veerman, Naomi Bacon-Shnoor, 2006 This volume attempts to examine the issue of prevention of violence to children in violent political conflicts from a multidisciplinary perspective that includes international law developmental psychology education communications and police science While this volume concentrates mainly on the Israeli Palestinian conflict it also presents the experience of others in different parts of the world who have coped successfully with prevention of violence to civilian populations and particularly to children The editors aim to engage military and police communities world wide and especially in our society Israel in a dialogue concerning the most effective ways to abide by international conventions of human rights and childrens rights to which Israeli society is committed The volume reports on practical methods to save the lives of civilians and children in political conflicts that have been tried and which serve to protect children **Bioethics and Armed Conflict** Michael Gross, 2006-06-16 Is medical ethics in times of armed conflict identical to medical ethics in times of peace as the World Medical Association declares In **Bioethics and Armed Conflict** the first comprehensive study of medical ethics in conventional unconventional and low intensity war Michael Gross examines the dilemmas that arise when bioethical principles clash with military necessity when physicians try to save lives during an endeavor dedicated to taking them and describes both the conflicts and congruencies of military and medical ethics Gross describes how the principles of contemporary just war unlike those of medical ethics often go beyond the welfare of the individual to consider the collective interests of combatants and noncombatants and the general interests of the state Military necessity plays havoc with such patients rights as the right to life the right to medical care informed consent confidentiality and the right to die The principles of triage in battle conditions dictate not need based treatment but the distribution of resources that will return the greatest number of soldiers to active duty And unconventional warfare including current wars on terrorism challenges the traditional concept of medical neutrality as physicians who have sworn to do no harm are called upon to lend their expertise to interrogational torture or to the development of biological or chemical weapons Difficult dilemmas inevitably arise during armed conflict and medicine Gross concludes is not above the fray Medical ethics in time of war cannot be identical to medical ethics in peacetime **Probing War & Warfare** Jawad Asgar Khan, 2005 **Forum for Applied Research and**

Public Policy, 1999 **Neuroscience and the Future of Chemical-Biological Weapons** Malcolm Dando, 2015-07-21

During the last century advances in the life sciences were used in the development of biological and chemical weapons in large scale state offensive programmes many of which targeted the nervous system This study questions whether the development of novel biological and chemical neuroweapons can be prevented as neuroscience progresses Preventing a Biochemical Arms Race Alexander Kelle, Kathryn Nixdorff, Malcolm Dando, 2012-10-31 Preventing a Biochemical Arms Race responds to a growing concern that changes in the life sciences and the nature of warfare could lead to a resurgent interest in chemical and biological weapons CBW capabilities By bringing together a wide range of historical material and current literature in the field of CBW arms control the book reveals how these two disparate fields might be integrated to precipitate a biochemical arms race among major powers rogue states or even non state actors It seeks to raise awareness among policy practitioners the academic community and the media that such an arms race may be looming if developments are left unattended and to provide policy options on how it and its devastating consequences could be avoided After identifying weaknesses in the international regime structures revolving around the Biological Weapons and Chemical Weapons Conventions it provides policy proposals to deal with gaps and shortcomings in each prohibition regime individually and then addresses the widening gap between them **Innovation, Dual Use, and Security** Jonathan B. Tucker, 2012 Recent

advances in disciplines such as biotechnology nanotechnology and neuropharmacology entail a dual use dilemma because they promise benefits for human health and welfare yet pose the risk of misuse for hostile purposes The emerging field of synthetic genomics for example can produce custom DNA molecules for life saving drugs but also makes possible the creation of deadly viral agents for biological warfare or terrorism The challenge for policymakers is to prevent the misuse of these new technologies without forgoing their benefits Innovation Dual Use and Security offers a systematic approach for managing the dual use dilemma The book presents a decision framework for assessing the security risks of emerging technologies and fashioning governance strategies to manage those risks This framework is applied to fourteen contemporary case studies including synthetic genomics DNA shuffling and directed evolution combinatorial chemistry protein engineering immunological modulation and aerosol vaccines The book also draws useful lessons from two historical cases the development of the V series nerve agents in Britain and the use and misuse of LSD by the U S Army and the CIA Innovation Dual Use and Security offers a comprehensive multifaceted introduction to the challenges of governing dual use technologies in an era of rapid innovation The book will be of interest to government officials and other practitioners as well as to students and scholars in security studies science and technology studies biology and chemistry **Small Arms Survey 2003**, 2003 This title includes information and analysis on global small arms production stockpiles and legal and illicit transfers and a review of international regional and national measures to address the issue of small arms proliferation

The Finnish Yearbook of International Law 1997 Martti Koskenniemi, Kari Takamaa, 1998-12-01 Despite its Finnish
