Hackers Paul Taylor, 2012-11-12 The practice of computer hacking is increasingly being viewed as a major security dilemma in Western societies by governments and security experts alike Using a wealth of material taken from interviews with a wide range of interested parties such as computer scientists security experts and hackers themselves Paul Taylor provides a uniquely revealing and richly sourced account of the debates that surround this controversial practice By doing so he reveals the dangers inherent in the extremes of conciliation and antagonism with which society reacts to hacking and argues that a new middle way must be found if we are to make the most of society s high tech meddlers

The Computer Culture Reader Joseph R. Chaney, Ken S. McAllister, Judd Ethan Ruggill, 2009-03-26 The Computer Culture Reader brings together a multi disciplinary group of scholars to probe the underlying structures and overarching implications of the ways in which people and computers collaborate in the production of meaning The contributors navigate the heady and sometimes terrifying atmosphere surrounding the digital revolution in an attempt to take its measure through examinations of community and modes of communication representation information production learning work and play The authors address questions of art reality

literacy history heroism commerce crime and death as well as specific technologies ranging from corporate web portals and computer games to social networking applications and virtual museums In all the essayists work around and through the notion that the desire to communicate is at the heart of the digital age and that the opportunity for private and public expression has taken a commanding hold on the modern imagination The contributors argue ultimately that the reference eld for the technological and cultural changes at the root of the digital revolution extends well beyond any specific locality nationality discourse or discipline Consequently this volume advocates for an adaptable perspective that delivers new insights about the robust and fragile relationships between computers and people

Die Tryin' Derek A. Burrill, 2008 *Die Tryin'* traces the cultural connections between videogames masculinity and digital culture It fuses feminist psychoanalytic Marxist and poststructuralist theory to analyze the social imaginary that is produced by and produces a particular form of masculinity boyhood The author asserts that digital culture is a culturally and historically situated series of practices products and performances all coalescing to produce a real and imagined masculinity that exists in perpetual adolescence and is reflective of larger masculine edifices at work in politics and culture Thus videogames form the central object of study as consumer technologies of control and anxiety as well as possibility and subversion Moving away from current games research the book favors a game specific approach that unites visual culture cultural studies and performance studies instead of a sociological structural inspection of the form

Hackers Paul A. The Computer Contradictionary Stan Kelly-Bootle, 1995 Ascertain the meaning before consulting this dictionary warns the author of this collection of deliberately satirical misdefinitions New computer cultures and their jargons have burgeoned since this book's progenitor *The Devil's DP Dictionary* was published in 1981 This updated version of Stan Kelly-Bootle's romp through the data processing lexicon is a response to the Unix pandemic that has swept academia and government to the endlessly hyped panaceas offered to the MIS and to the PC explosion that has brought computer terminology to a hugely bewildered lay audience The original dictionary a pastiche of Ambrose Bierce's famous work parried chiefly the mainframe and mini folklore of the 1950s 1960s and 1970s This revision adds over 550 new entries and enhances many of the original definitions Key targets are a host of new follies crying out for cynical lexicography including the GUI Phooey iconoclasts object orienteering and the piping of BLObs down the Clinton Gore InfoPike
