New Horizons in Sperm Cell Research Hideo Mohri, 1987 **The Fallopian Tubes** Ronald H.F. Hunter, 2012-12-06 This monograph has been written in the hope that it will prove of value to medical students and clinicians to Honours undergraduates in appropriate branches of the natural sciences and to reproductive biologists in general It would be pleasing if the text also caught the attention of veterinary undergraduates since there is much information bearing on reproduction in domestic animals First and foremost however the intended audience is a medical one for scientific studies of human reproduction have been catalyzed by the intense interest in procedures of fertilization in vitro Some would judge that this very activity has narrowed our view of physiological events occurring within the Fallopian tubes The present work may therefore serve as a useful counterbalance to the overwhelming series of publications on procedures of in vitro fertilization and offer opportunities to those in the clinical field for extending their knowledge of the scientific background to much of the current work **Gametes - The Spermatozoon** Jurgis Gediminas Grudzinskas, J. L. Yovich, 1995-09-07 This is

detailed comprehensive and timely account of the spermatozoon and its reproductive function **The Evolutionary Biology of the Bivalvia** Elizabeth Harper, John David Taylor, J. Alistair Crame, 2000 Bivalves are key components of recent marine and freshwater ecosystems and have been so for most of the Phanerozoic Their rich and long fossil record combined with their abundance and diversity in modern seas has made bivalves the ideal subject of palaeobiological and evolutionary studies Despite this however topics such as the early evolution of the class relationships between various taxa and the life habits of some key extinct forms have remained remarkably unclear This volume integrates palaeontological and zoological approaches and sheds new light on the course of bivalve evolution **Vajikarana : Sexology in Ayurveda** Prof. Dr.
