New Insights Into Retinal Degenerative Diseases Robert E. Anderson, Matthew M. LaVail, Joe G. Hollyfield, 2001-12-31 Since 1984 we have organized satellite symposia on retinal degenerations that are held in conjunction with the biennial International Congress of Eye Research The timing and location of our Retinal Degeneration Symposia have allowed scientists and clinicians from around the world to convene and present their exciting new findings The symposia have been arranged to allow ample time for discussions and one on one interactions in a relaxed atmosphere where international friendships and collaborations could be established The IXth International Symposium on Retinal Degeneration was held on October 9 14 2000 in Durango Colorado and was attended by over 100 scientists from six continents This book contains many of their presentations Several events of note occurred at this meeting First thanks to the generous support of the Foundation Fighting Blindness we were able to sponsor the travel of 11 young scientists from six countries Most of them have contributed chapters to this volume The response to the travel program was so overwhelming that we will make it regular feature of our meeting This will allow other bright young investigators to be introduced to the world experts who study retinal degenerations Second about 40% of the scientists who attended this meeting were there for the first time We believe that this indicates a growing interest in retinal degeneration research and ensures that new talent will be attracted to this important area of investigation The symposium received support from several organizations New Insights Into Retinal Degenerative Diseases Robert E. Retinal Degenerative Diseases and Experimental Therapy Joe G. Hollyfield, Robert E. Anderson, Matthew M. LaVail, 2007-09-04 To create a forum for scientists and clinicians interested in degenerative retinal diseases we began in 1984 to organize a biennial symposium on Retinal Degeneration as a satellite meeting of the International Congress of Eye Research The timing and varying location of these meetings provides an important assembly for investigators from throughout the world to convene for presentation of their new findings on the causes and potential therapies for degenerative retinal disorders The VIII International Symposium on Retinal Degeneration was held from July 28 25 1998 at the Hotel Vier Jahreszeiten in Schluchsee a small town in the Black Forest of southwestern Germany Most of the participants in this meeting contributed to this volume and we are appreciative of the efforts of each author in making this publication possible The research presented at the meeting and described in this proceedings volume reflects a strong emphasis on the molecular genetic approach to understanding these disorders Several of the papers provide important new insights into the mechanism of photoreceptor degeneration and cell death A number of the studies are targeted at retarding or reversing the degeneration process Included for the first time are presentations from all the principal laboratories involved in the field of visual prostheses implant chip technology in which investigations are targeted at restoring vision in eyes that have lost photoreceptor cells A variety of diagnostic clinical histopathological and physiological assessments of retinal degeneration in patients are also included
