New International Financial Architecture And Korean Perspectives:

New International Financial Architecture and Korean Perspectives, 2001 New International Financial Architecture and Korean Perspectives Tae-jun Kim, 2001 **New International Financial Architecture and Korean Perspectives** Tae-jun Kim, 2001 **The Asian Financial Crisis: New International Financial Architecture** Shalendra Sharma, 2003-10-03 The Asian financial crisis of 1997-98 shook the foundations of the global economy. What began as a localized currency crisis soon engulfed the entire Asian region. What went wrong and how did the Asian economies long considered miracles respond? How did the United States, Japan and other G-7 countries react to the crisis? What role did the IMF play? Why did China remain conspicuously insulated from the turmoil raging in its midst? What lessons can be learnt from the crisis by other emerging economies? This book provides answers to all the above questions and more. It gives a comprehensive account of how the international economic order operates, examines its strengths and weaknesses and what needs to be done to fix it. The book will be vital to students of economics, international political economy, Asian and development studies.

The IMF and its Critics David Vines, Christopher L. Gilbert, 2004-02-26 The IMF is the first economic institution in line to protect countries from the effects of financial crises and to insulate the world economy from possible systemic risk. However, many argue that the IMF is insufficiently equipped to do this job while others argue almost the opposite: the IMF's well-intentioned actions induce other countries to take risks which increase their exposure from both universities and the multilateral agencies. Combines rigorous economic analysis with insider perspectives on key policy debates. It analyses the Asian and Argentine financial crises of the late 1990s, issues of policy ownership, the more general quest for financial stability and governance of the IMF. It is an essential reference for anyone interested in the role of international financial institutions in our globalised economy.

Reforming the International Financial Architecture Il SaKong, 2000 *The Politics of the New International Financial Architecture* Susanne Soederberg, 2004-11 This is a critique of the attempts of the G7 industrialized countries to rewrite the rules of international finance. It includes case studies on capital controls from Chile and Malaysia and is aimed at scholars and students of international political economy and development and reform activists.

Critical and Feminist Perspectives on Financial and Economic Crises Sakiko Fukuda-Parr,James Heintz,Stephanie Seguino,2017-10-02 Economic and financial crises have become perennial features of today s global economy Macroeconomic theories of crisis including the global crisis that unfolded in 2008 emphasize the role of financial deregulation capital flow imbalances and growing debt fueled by income and wealth inequality These approaches tend to be divorced from feminist thinking which analyzes broader distributional dynamics transmitted through structural channels and government policy responses with an emphasis on gender race class and ethnicity This volume brings together innovative thinking from heterodox macroeconomists and feminist economists to explore the causes consequences and ramifications of economic crises By doing so it highlights aspects of the economy that are frequently overlooked or ignored such as the impact of crises on the vast amount of unpaid work which women perform relative to men The collection of international studies assembled here takes an innovative approach to analyzing a range of issues from the subprime mortgage crisis to the gendered effects of austerity to the role of the International Monetary Fund in governing an unstable global economy In so doing it looks beyond causes and consequences and points to new directions for macroeconomic and financial policy This book was originally published as a special issue of *Feminist Economics*
