attend classes exclusively with other children with disabilities or receive some other service that allows him or her to learn. This new revised edition is a step by step guide to serving children and youth with disabilities as well as the family members, caregivers and other people involved in their lives. The authors show how staff can enable full use of the library's resources by integrating the methods of educators, medical and psychological therapists, social workers, librarians, parents and other caregivers. Widening the scope to address the needs of teens as well as preschool and school age children, this edition also discusses the needs of Spanish speaking children with disabilities and their families, looking at cultural competency as well as Spanish language resources. Enhanced with checklists, stories based on real experiences, descriptions of model programs and resources, and an overview of appropriate internet sites and services, this how to gives thorough consideration to Partnering and collaborating with parents and other professionals, Developing special collections and resources, Assessing competencies and skills, Principles underlying family centered services and resource based practices, The interrelationship of early intervention, special education and library service. This manual will prove valuable not only to children's services librarians, outreach librarians and library administrators but also early intervention and family support professionals, early childhood and special educators, childcare workers, daycare and after school program providers and policymakers.

The Second Self, Twentieth Anniversary Edition Sherry Turkle, 2005-09-30. A new edition of the classic primer in the psychology of computation with a new introduction, a new epilogue and extensive notes added to the original text. In *The Second Self*, Sherry Turkle looks at the computer not as a tool but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another and of our relationship with the world. Technology, she writes, catalyzes changes not only in what we do but in how we think. First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture, to re-experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers and personal computer owners, people confronting machines that seem to think and at the same time suggest a new way for us to think about human thought, emotion, memory and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. In the introduction to this edition, Turkle quotes a PDA user as saying, "When my Palm crashed it was like a death. I thought I had lost my mind." Why we think of the workings of a machine in psychological terms, how this happens and what it means for all of us is the ever more timely subject of *The Second Self*.
