Discourses on Algebra Igor R. Shafarevich,2012-12-06 I wish that algebra would be the Cinderella of our story In the mathematics program in schools geometry has often been the favorite daughter The amount of geometric knowledge studied in schools is approximately equal to the level achieved in ancient Greece and summarized by Euclid in his Elements third century B C For a long time geometry was taught according to Euclid simplified variants have recently appeared In spite of all the changes introduced in geometry courses geometry retains the influence of Euclid and the inclination of the grandiose scientific revolution that occurred in Greece More than once I have met a person who said I didn't choose math as my profession but I'll never forget the beauty of the elegant edifice built in geometry with its strict deduction of more and more complicated propositions all beginning from the very simplest most obvious statements Unfortunately I have never heard a similar assessment concerning algebra Algebra courses in schools comprise a strange mixture of useful rules logical judgments and exercises in using aids such as tables of logarithms and pocket calculators Such a course is closer in spirit to the brand of mathematics developed in ancient Egypt and Babylon than to the line of development that appeared in ancient Greece and then continued from the Renaissance in western Europe Nevertheless algebra is just as fundamental just as deep and just as beautiful as geometry Mathematics Today-8 (ICSE) S.K. Gupta & Anubhuti Gangal, All mathematical concepts have been presented in a very simple and lucid form Unit summary of key facts at the end Mental Maths Exercises Unit Review Exercises Historical Notes Quizzes Puzzles and Enrichment Material have been included The special feature of this edition is the inclusion of Multiple Choice Questions Challengers HOTS Worksheets and Chapter Tests The ebook version does not contain CD **The London, Edinburgh, and Dublin Philosophical Magazine and Journal of Science** ,1852
