The Political System of Germany Florian Grotz,Wolfgang Schroeder,2023-08-11 This book offers a systematic theory based and empirically grounded introduction to the political system of Germany Compared to other textbooks on government and politics in Germany it has two particular benefits First it analyzes the individual dimensions of the German political system from a uniform theoretical perspective based on the well known distinction between majoritarian and consensus democracy Second it particularly explains how political decision making in the multi level system takes place including the local state federal as well as EU levels This way the book provides a comprehensive detailed and clear picture of how German democracy is organized and how it works

The Constitution as Political Structure Martin H. Redish,1995 Over the last forty years modern constitutional scholarship has concentrated on an analysis of rights while principles of constitutional law concerning the structure of government have been largely down played The irony of this interpretive emphasis is that the body of the Constitution contains relatively little dealing directly with rights Rather it is primarily a blueprint for the establishment of a complex form of federal democratic structure The Constitution as Political Structure emphasizes the central role served by the structural portions of the Constitution Redish argues that these structural values were designed to provide the framework in which our rights based system may flourish and that judicial abandonment of these structural values threatens the very foundations of American political theory In its exposition of the textual and theoretical rationales for judicial enforcement of the structural values embodied in the Constitution this book presents a principled alternative to the extremes of judicial abdication articulated by certain scholars and Justices on the one hand and the result oriented ideological involvement advocated in some quarters on the other This work will be of great interest to scholars of law and political science

Russian Political Institutions Maksim Kovalevski,1966

The Analysis of Political Structure David Easton,2024-11-01 First Published in 1990 The Analysis of Political Structure is a major work of theory by one of our leading political scientists David Easton here comes to grips with the nature of political structure the way in which a political system is organized for making decisions or its regime Current methodologies within political science have failed to anticipate regime changes We know little about the conditions for the emergence maintenance or decline of democratic or authoritarian types of regime structures For example the changes in Eastern Europe have come as a complete surprise This liability to predict is Easton argues in part due to the limitations of the decompositional research typical of political science Easton applies a method informed by theories of structuralism to the largely untouched field of political analysis He takes a holistic systems analysis approach in place of predominant decompositional methods and argues that the organizational structure of political systems decides the forms regimes take To support his case Easton notably engages the work of Nicos Poulantzas a leading structural Althusserian Marxist He shows how Poulantzas work supports the new statist movement which fails to account for the variety of forms of regimes This is a must read for students and scholars of political science

Political Trust in China Lianjiang Li,2025-07-22 The authoritarian regime in China is a prime target of the US led war on autocracy however the regime claims a majority of the Chinese people trust the government with national surveys since the 1990s supporting this assertion How much do Chinese citizens actually trust the one party regime Instead of dismissing survey results Li examines the contexts in which Chinese citizens are predisposed to say they trust the government He argues that political trust in China is a power accommodating and nonbinding hope rather than a rights based and binding expectation as Chinese citizens do not have the right to grant and retract trust through free and fair elections

The Hijacking of the American Political System Kodzo Mawusi, 2010-08-31 Mr Kodzo Mawusi is a charismatic Roman Catholic Evangelist and Theologian He is an active member of St John Bosco parish a member of the Parish Council Stewardship Committee and leads their Prayer and Bible Study group After graduating and working for years in engineering decided to pursue theological studies He received his Bachelor of Theology degree from Newman Theological College in 1998 and the Master of Theology degree from St Andrew s College University of Saskatchewan Saskatoon in 2003 He is an inspiring speaker on social and religious or spiritual issues and have authored books on these subjects He is an ordained minister of the Gospel and an affiliate of the Hunter and Joan Hunter Ministries His interest in social justice led him to take a closer look at the impact of politics on our social lives globally The central theme of his message to all politicians is to transform their lives into real leaders capable of standing for morality and personal dignity in society To refrain from their hypocritical behaviours and show proper leadership qualities to make the world a better place for all *Social Classes and Political Order in the Age of Data* Georges Kotrotsios, 2022-09-28 Our lives are changing today but what is the single most important factor driving these changes This question is crucial because attempting to answer it can guide us to an understanding of the processes that are impacting our societies The answer will of course come from the historians of the future but there is already no doubt that the advent of data is behind a radical shake up of our way of living Monetary assets infrastructure equipment and human labor all allow wealth to be created Data does too and it is reasonable to consider a new production factor in this regard data capital This book argues that this new production factor generates innumerable economic opportunities of a nature unthought of a mere twenty years ago These opportunities have led to the creation of a new social class composed of two subclasses data workers and data owners The emergence of this new class repositions existing classes including the traditional working class and the capitalist class creating strong divergences that threaten social cohesion What can we do to ensure cohesion and the proper functioning of society The book argues for the establishment of a regulatory framework and the institutions necessary if we are to open data up and where appropriate exchange and trade it all on a global scale In this regard the state today still playing its traditional role of framework setter and savior when crises loom can become an active economic player thus creating wealth for communities
