The New Digital Shoreline Roger McHaney, 2023-07-03 Two seismic forces beyond our control the advent of Web 2.0 and the inexorable influx of tech savvy Millennials on campus are shaping what Roger McHaney calls The New Digital Shoreline of higher education Failure to chart its contours and adapt poses a major threat to higher education as we know it These forces demand that we as educators reconsider the learning theories pedagogies and practices on which we have depended and modify our interactions with students and peers all without sacrificing good teaching or lowering standards to improve student outcomes Achieving these goals requires understanding how the indigenous population of this new shoreline is different These students aren't necessarily smarter or technologically superior but they do have different expectations Their approaches to learning are shaped by social networking and other forms of convenient computer enabled and mobile communication devices by instant access to an over abundance of information by technologies that have conferred the ability to personalize and customize their world to a degree never seen before and by time shifting and time slicing As well as understanding students assumptions and expectations we have no option but to familiarize ourselves with the characteristics and applications of Web 2.0 essentially a new mind set about how to use Internet technologies around the concepts of social computing social media content sharing filtering and user experience Roger McHaney not only deftly analyzes how Web 2.0 is shaping the attitudes and motivations of today's students but guides us through the topography of existing and emerging digital media environments applications platforms and devices not least the impact of e readers and tablets on the future of the textbook and the potential they have for disrupting teacher student relationships and if appropriately used for engaging students in their learning This book argues for nothing less than a reinvention of higher education to meet these new realities Just adding technology to our teaching practices will not suffice McHaney calls for a complete rethinking of our practice of teaching to meet the needs of this emerging world and envisioning ourselves as connected co learners with our students

Information Ethics Adam Daniel Moore,2012-09-01 This anthology focuses on the ethical issues surrounding information control in the broadest sense Anglo American institutions of intellectual property protect and restrict access to vast amounts of information Ideas and expressions captured in music movies paintings processes of manufacture human genetic information and the like are protected domestically and globally The ethical issues and tensions surrounding free speech and information control intersect in at least two important respects First the commons of thought and expression is threatened by institutions of copyright patent and trade secret While institutions of intellectual property may be necessary for innovation and social progress they may also be detrimental when used by the privileged and economically advantaged to control information access consumption and expression Second free speech concerns have been allowed to trump privacy interests in all but the most egregious of cases At the same time our ability to control access to information about ourselves what some call informational privacy is rapidly diminishing Data mining and digital profiling are opening up what most would consider private domains for public consumption and manipulation Post 9 11 issues of national security have run headlong into individual rights to privacy and free speech concerns While constitutional guarantees against unwarranted searches and seizures have been relaxed access to vast amounts of information held by government agencies libraries and other information storehouses has been restricted in the name of national security Awakening our Faith in the Future Peter T. Dunlap,2015-12-22 What transformation would happen if we could combine the best of liberal politics with psychology

Awakening our Faith in the Future investigates the avenues for creating a new branch of psychology a transformative political psychology In the past political psychology has focused directly on analysis and knowledge acquisition rather than on interventions that transform self and culture A transformative political psychology combines the best of traditional social science with the transformative intent of clinical psychology in order to create a new political culture Peter T Dunlap suggests that while liberals focus intently outside of themselves on changing the world those with psychological interests focus much more internally on changing themselves In this book he argues that by combining political liberalism and psychology and encouraging psychologists to develop cultural learning practices based on ideas of self knowledge there is opportunity to transform our political culture Divided into five parts this book explores stories of political destiny questions of development opportunities for political development a speculative theory of cultural evolution practices of a political psychologist This scholarly text uses personal experiences and the stories of progressive political leaders as pathways for addressing political problems making it ideal reading for professionals and students in the fields of both politics and psychology as well as for activists interested in the future of liberalism *Mortuary Confidential* Todd Harra, Ken

Decolonized Hélé Beji,2025-05-06 We the Decolonized is a passionate reflection on the pitfalls of the decolonial venture in postcolonial countries with particular reference to North Africa H l B ji shows that in many formerly colonized countries the reality of independence took the form of elusive freedom widespread disillusionment and the insidious survival of forms of domination bequeathed by former colonial powers B ji delivers an trenchant critique of decolonization the saddest of all liberties because it has not kept its promises Those who had vanquished colonialism vindicated civilization and struggled free from the yoke of illegitimate government found themselves ensnared in a new trap having achieved emancipation without liberation They remained entangled in a compulsive recycling of colonial impulses To re embark on the route to a truly free society intellectuals and political figures must lead by example in acknowledging the reality of the past adopting tolerant

attitudes towards religions and embracing a new and secular democratic mentality B ji s important contribution to the decolonial canon will be of great interest to anyone concerned with the politics of decolonization in Africa and the Maghreb and in the Global South more broadly

A Change of Heart Kevin J. McCarthy, Ph.D,2014-09-25 Any attempt to produce a change of mind or a change in behaviors is doomed to fail given our human natures While we may have thoughts of creating this process in our personal life we are unable to sustain our focus given the constant barrage of worldly distractions Slowly or quickly our resolve ebbs away and once more we re caught up in the choices that bring pain and shame into our life and the lives of those we love Nothing changes until we experience a change of heart This is not an event but rather a journey that guides life and transforms character This change of heart is a gift that is extended to those who have come to the realization that of themselves they can do nothing Surrender is the key word and that is likely a difficult concept to tolerate in our human condition Yet as you surrender your will on a regular basis your life purpose will slowly and consistently be revealed in the opportunities that arise With each succeeding door that opens there will come a flow of challenges blessings and gifts that serve to sustain and nourish continued growth Out of this process you will come to fully understand that there is a purpose for life and that the greatest joy comes from fulfilling that promise This is not a preachy book filled with solemn sayings rather it is a tribute to Jesus Christ who can work His purpose in any surrendered life My desire is that you join me on this pathway to personal transformation Your faith will grow as you come to understand the dynamic of surrender Out of your faith will grow a new and profound sense of hope that will complete its work in your life You cannot buy this gift or steal it as a possession yet it is offered freely to those who are committed to finding the truth *The Fox in the Henhouse* Si Kahn,Elizabeth Minnich,2005-10-27 Privatization has been on the right wing agenda for years Health care schools Social Security public lands the military prisons all are considered fair game Through stories analysis impassioned argument even song lyrics Si Kahn and Elizabeth Minnich show that corporations are by their very nature unable to fulfill effectively what have traditionally been the responsibilities of government They make a powerful case that the market is not the measure of all things and that a vital public sector is an indispensable component of a healthy democracy A Companion to Reality Television Laurie Ouellette,2016-12-19 International in scope and more comprehensive than existing collections A Companion to Reality Television presents a complete guide to the study of reality factual and nonfiction television entertainment encompassing a wide range of formats and incorporating cutting edge work in critical social and political theory Original in bringing cutting edge work in critical social and political theory into the conversation about reality TV Consolidates the latest broadest range of scholarship on the politics of reality television and its vexed relationship to culture society identity democracy and ordinary people in the media Includes primetime reality entertainment as well as precursors such as daytime talk shows in the scope of discussion Contributions from a list of international leading scholars in this field

Social Contract Theory for a Diverse World Ryan Muldoon,2016-10-14 Very diverse societies pose real problems for

Rawlsian models of public reason This is for two reasons first public reason is unable accommodate diverse perspectives in determining a regulative ideal Second regulative ideals are unable to respond to social change While models based on public reason focus on the justification of principles this book suggests that we need to orient our normative theories more toward discovery and experimentation The book develops a unique approach to social contract theory that focuses on diverse perspectives It offers a new moral stance that author Ryan Muldoon calls The View From Everywhere which allows for substantive fundamental moral disagreement This stance is used to develop a bargaining model in which agents can cooperate despite seeing different perspectives Rather than arguing for an ideal contract or particular principles of justice Muldoon outlines a procedure for iterated revisions to the rules of a social contract It expands Mill s conception of experiments in living to help form a foundational principle for social contract theory By embracing this kind of experimentation we move away from a conception of justice as an end state and toward a conception of justice as a trajectory Listen to Robert Talisse interview Ryan Muldoon about Social Contract Theory for a Diverse World on the podcast New Books in Philosophy <http://tinyurl.com/j9oq324> Also read Ryan Muldoon s related Niskanen Center article Diversity and Disagreement are the Solution Not the Problem published Jan 10 2017 <https://niskanencenter.org/blog/diversity-disagreement-solution-not-problem> *Digital Data Collection and Information Privacy Law* Mark Burdon, 2020-04-23 In *Digital Data Collection and Information Privacy Law* Mark Burdon argues for the reformulation of information privacy law to regulate new power consequences of ubiquitous data collection Examining developing business models based on collections of sensor data with a focus on the smart home Burdon demonstrates the challenges that are arising for information privacy s control model and its application of principled protections of personal information exchange By reformulating information privacy s primary role of individual control as an interrupter of modulated power Burdon provides a foundation for future law reform and calls for stronger information privacy law protections This book should be read by anyone interested in the role of privacy in a world of ubiquitous and pervasive data collection
