Our Scientific World:

The Conscious Universe Menas Kafatos, Robert Nadeau, 2012-12-06 This discussion resulted from a dialogue which began some seven years ago between a physicist who specializes in astrophysics general relativity and the foundations of quantum theory and a student of cultural history who had done post doctoral work in the history and philosophy of science Both of us at that time were awaiting the results of some experiments being conducted under the direction of the physicist Alain Aspect at the University of Paris South The experiments were the last in a series designed to test some predictions based on a mathematical theorem published in 1964 by John Bell There was no expectation that the results of these experiments would provide the basis for developing new technologies The questions which the experiments were designed to answer concerned the relationship between physical reality and physical theory in the branch of physics known as quantum mechanics Like most questions raised by physicists which lead to startling new insights they were disarmingly simple and direct Is quantum physics asked Bell a self consistent theory whose predictions would hold in a new class of experiments or would the results reveal that the apparent challenges of quantum physics to the understanding in classical physics of the relationship between physical theory and physical reality were merely illusory Answering this question in actual experiments could also suggested Bell lead to another quite dramatic result

Scientific Realism N. Rescher, 1987-08-31 The increasingly lively controversy over scientific realism has become one of the principal themes of recent philosophy 1 In watching this controversy unfold in the rather technical way currently in vogue it has seemed to me that it would be useful to view these contemporary disputes against the background of such older epistemological issues as fallibilism scepticism relativism and the traditional realism idealism debate This then is the object of the present book which will reconsider the newer concerns about scientific realism in the context of these older philosophical themes Historically realism concerns itself with the real existence of things that do not meet the eye with suprasensible entities that lie beyond the reach of human perception In medieval times discussions about realism focused upon universals Recognizing that there are physical objects such as cats and triangular objects and red tomatoes the medievals debated whether such abstract objects as cathood and triangularity and redness also exist by way of having a reality independent of the concretely real things that exhibit them Three fundamentally different positions were defended 1 Nominalism Abstracta have no independent existence as such they only exist in and through the objects that exhibit them Only particulars individual substances exist Abstract objects are existents in name only mere thought fictions by whose means we address concrete particular things 2 Realism Abstracta have an independent existence as such *The Conception of God* Josiah Royce, 1895 [The Basic Writings of Bertrand Russell](#) Bertrand Russell, 2009-03-04 Featuring seminal work in the philosophies of mathematics and language this comprehensive and assiduously edited collection also makes available his provocative and controversial views on religion and international relations **The Metaphysics of Dante's Comedy** Christian Moevs, 2005-03-17 Dante's metaphysics his understanding of reality is very different from our

own To present Dante's ideas about the cosmos or God or salvation or history or poetry within the context of post Enlightenment presuppositions as is usually done is thus to capture only imperfectly the essence of those ideas The recovery of Dante's metaphysics is essential argues Christian Moevs if we are to resolve what has been called the central problem in the interpretation of the Comedy That problem is what to make of the Comedy's claim to the status of revelation vision or experiential record as something more than imaginative literature In this book Moevs offers the first sustained treatment of the metaphysical picture that grounds and motivates the Comedy and of the relation between those metaphysics and Dante's poetics He carries this out through a detailed examination of three notoriously complex cantos of the Paradiso read against the background of the Neoplatonic and Aristotelian tradition from which they arise Moevs finds the key to the Comedy's metaphysics and poetics in the concept of creation which implies three fundamental insights into the nature of reality 1 The world finite being is radically contingent dependent at every instant on what gives it being 2 The relation between the world and the ground of its being is non dualistic God is not a thing and there is nothing the world is made of 3 Human beings are radically free unbound by the limits of nature and thus can find all of time and space within themselves These insights are the foundation of the pilgrim Dante's journey from the center of the world to the Empyrean which contains it For Dante in sum what we perceive as reality the spatio temporal world is a creation or projection of conscious being which can only be known as oneself Moevs argues that self knowledge is in fact the keystone of the Aristotelian and Neoplatonic philosophical tradition and the essence of the Christian revelation in which that tradition culminates Armed with this new understanding Moevs is able to shed light on a series of perennial issues in the interpretation of the Comedy In particular it becomes clear that poetry coincides with theology and philosophy in the poem Dante poeta cannot be distinguished from Dante theologus

Truthfulness of Beauty Robert Gilbert,2017-08-15 When scientists describe their results or insights as beautiful are they using the term differently from when they use it of a landscape music or another person Science and the Truthfulness of Beauty re examines the way in which seeing beauty in the world plays the key role in scientific advances and argues that the reliance on such a personal point of view is ultimately justified by belief that we are made in the image of God as Christian and Jewish believers assert It brings a fresh voice to the ongoing debate about faith and science and suggests that scientists have as much explaining to do as believers when it comes to the ways they reach their conclusions Annual Report -

Man or Matter Ernst Lehrs, 2019-11-29 In *Man or Matter* Ernst Lehrs explores the intricate relationship between consciousness and the material world through a philosophical lens rooted in anthroposophy. This seminal work presents a synthesis of scientific inquiry and spiritual understanding, examining how human beings perceive and interact with reality. Lehrs employs a clear didactic style, carefully articulating complex theories while inviting readers to contemplate their own existence within a broader cosmic framework. The book is situated within the context of early 20th century thought, where metaphysical questions regarding the nature of being were profoundly engaging a generation eager to reconcile spirituality and science. Ernst Lehrs, an influential thinker and educator within the anthroposophical movement, was deeply motivated by the quest for meaning in a rapidly changing world. His personal experiences and scholarly pursuits allowed him to engage with both scientific paradigms and esoteric traditions, thus enriching his exploration of the human condition. Lehrs' academic background and profound awareness of natural sciences inform the rigor and depth of his arguments, making his insights valuable for readers seeking to navigate contemporary spiritual dilemmas. *Man or Matter* is a thought-provoking read that challenges conventions and encourages profound self-reflection. It is highly recommended for those interested in the intersection of philosophy, science, and spirituality, as well as for anyone questioning the very nature of existence. This work not only informs but inspires, making it a significant contribution to modern philosophical literature.

Consciousness and Fundamental Reality Philip Goff, 2017 The first half of this book argues that physicalism cannot account for consciousness and hence cannot be true. The second half explores and defends Russellian monism, a radical alternative to both physicalism and dualism. The view that emerges combines panpsychism with the view that the universe as a whole is fundamental.

Psychology and the Soul Otto Rank, 1998 In his last years, Otto Rank turned his lifetime of thought and learning toward two of the most difficult topics in human history: religion and the soul. The result was this now classic work, available in this new, very accessible English translation. Unlike many other intellectuals of the twentieth century, Rank maintains a place for the soul rather than dismissing it as a fantasy. The soul and the beliefs about it, he argues, set forth the foundation for psychology with its complex analyses of consciousness, self-consciousness, and personality. Rank's commentary is not limited to beliefs about individual souls but includes ideas about group souls, sometimes encompassing nations or generations. Rank suggests that it is in expression of group beliefs that the idea of the soul attains its greatest power.

Consciousness Prem Saran Satsangi, Stuart Hameroff, Vishal Sahni, Pami Dua, 2016-01-01 This unique volume brings together eastern and western perspectives on consciousness with essays from philosophers and scientists which emphasize different aspects of the integration. The overarching aim of this book is to provide direction toward integrating Eastern philosophical and religious practice with philosophies and science of Western culture, an aim that could be pivotal in understanding consciousness and its place in nature. A unifying approach is adopted to the study of consciousness, integrating the wisdom of the sages of the

east and the scientists of the west and the stupendous east west integration that has been achieved is indeed a milestone The book will appeal to the rapidly growing mass of scientists and students in this upcoming field both in the east and west as well as the general inquisitive reader Courses in consciousness studies are being promoted in leading Universities all over the world It will also interest the followers and adherents of Eastern Philosophy of Saints and Radhasoami Faith numbering in a few millions around the globe Chips from a German Workshop: Essays chiefly on the science of language. With index to vols. III and IV Friedrich Max Müller,1890 *Dictionary Of Modern American Philosophers* John R. Shook,2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought **Relational Concepts in Medicine** ,2020-05-18 **The Apocalyptic Dimensions of Climate Change** Jan Alber,2021-09-07 Climate change and the apocalypse are frequently associated in the popular imagination of the twenty first century This collection of essays brings together climatologists theologians historians literary scholars and philosophers to address and critically assess this association The contributing authors are concerned among other things with the relation between cultural and scientific discourses on climate change the role of apocalyptic images and narratives in representing environmental issues and the tension between reality and fiction in apocalyptic representations of catastrophes By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change By evoking a sense of collective human destiny in the face of the ultimate catastrophe apocalyptic narratives have both cautionary and inspirational functions Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims of this book Interagency Coordination of Information United States. History, Historicity and Science Joseph Margolis, 2016-12-05 This fresh collection of essays questions how the historical process affects our conception of science including our understanding of its validity as well as our general conception of knowledge The essays in this book consider the philosophical labours spanning the work of Descartes Kant and Hegel still the philosophical basis of our modern understanding of science as well as recent selected philosophers and historians of science such as Kuhn and Feyerabend Themes raised include the philosophical basis for the validity of science the possibility of ever knowing the independent world as it truly is and the intelligibility of construing scientific knowledge as a historical Taken separately and together these essays provide a sustained analysis of scientific claims to objective standing the historicity of thought and inquiry They point toward unfinished philosophical business and the need for a new beginning
