Reynolds, 2002-04-25 Despite being the centerpiece of rural educational reform for most of the twentieth century rural school consolidation has received remarkably little scholarly attention The social history and geography of the movement the widespread resistance it provoked and the cultural landscapes its proponents sought to transform have remained largely unexplored Now in *There Goes the Neighborhood* David Reynolds remedies this situation by examining the rural school consolidation movement in that most midwestern of midwestern states Iowa From 1912 to 1921 Iowa was the center of national attention as state and local education leaders attempted to implement a new model of rural education intended to be emulated throughout the rest of the Midwest As part of the Country Life movement whose leaders sought to create a more modern future for farm families an alternative form of

rural community that combined the advantages of both city and country the initially successful model collapsed in the early twenties not to be revived until after World War II Reynolds focuses on how and why rural school consolidation was so vigorously resisted in most of Iowa why it failed in the twenties and what its lasting consequences have been Combining social and oral history modern social theory historical geography and ethnography *There Goes the Neighborhood* is the most authoritative analysis to date of the politics geography and social history of rural school consolidation in any state
