Our Senses:

Our Senses Rob DeSalle, 2018-01-09 An animated introduction to the neuroscience of sensory perception informed by the latest research on topics from music to brain injuries to synesthesia Kirkus Reviews In recent years neuroscience has uncovered a wealth of new information about our senses and how they serve as our gateway to the world This splendidly accessible book explores the most intriguing findings of this research With infectious enthusiasm Rob DeSalle illuminates not only how we see hear smell touch taste maintain balance feel pain and rely on other less familiar senses but also how these senses shape our perception of the world aesthetically artistically and musically DeSalle first examines the question of how perception and consciousness are formed in the brain setting human senses in an evolutionary context He then investigates such varied themes as supersenses and diminished senses synesthesia and other cross sensory phenomena hemispheric specialization diseases anomalies induced by brain injuries and hallucinations Focusing on what is revealed about our senses through the extraordinary he provides unparalleled insights into the unique wonders of the human brain In the laboratory sensory science is serious business But in the capable hands of Rob DeSalle it becomes fun and compelling for the general reader and is made all the more accessible by Patricia Wynne s delightful illustrations Ian Tattersall author of *The Strange Case of the Rickety Cossack and Other Cautionary Tales from Human Evolution*

Our Senses Janine Scott, 2003 A simple introduction to the five basic senses and such other senses as balance hunger and thirst [Coming to Our Senses](#) Viki McCabe, 2014-02-03 This book concerns perception cognition information structure complexity and theories It challenges the theory that our perceptions are unreliable shows that information reflects the structural organization of the complex systems that constitute our world and documents that the theories we construct detach us from reality and lead us astray

Making Sense of Our Senses Gr. K-1, *Our Sense of the Real* Kimberley Curtis, 1999 This bold and persuasive study rereads the works of Hannah Arendt to recuperate her relevance to contemporary politics and to show that her deepest concerns are oriented by her ontology Kimberley Curtis interprets Arendt s earlier work through the lenses of *The Life of the Mind* elucidating what Curtis calls an aesthetic sensibility of tragic pleasure as a way out of the enclave politics of late modernity Arguing that oblivion and radical forgetfulness of others are among the most ethically troubling features of our political landscape Curtis shows that Arendt s aesthetic account of politics offers us an idiom in which to name and resist the depravations and dangers of our political condition Curtis also elucidates Arendt s debt to phenomenology and argues that our sense of reality is born through highly charged sensuous provocation and mutual responsiveness Arendt s innovation is to recognize that this countenancing of others is an aesthetic experience that creates the political world Curtis plumbs the relevance of this work in current issues such as gated communities for the privileged and prisons for the disenfranchised and in the extraordinary relationship between a black civil rights leader and a Ku Klux Klan officer *Our Sense of the Real* is a poetic invocation of Arendt s politics at once lively passionate and crucial
