Out of the Blue. U.S. Army Airborne Operations in World War II. James A. Huston, 1972      *Out of the Blue* James A. Huston, 1998 Beginning with a case study of the greatest airborne operation of the war the 1944 invasion of Holland Huston examines the inception organization training equipment strategies Allied cooperation and overall effectiveness of the airborne in the total war effort Operations in North Africa Sicily Italy Southern France the Pacific and the Far East are discussed No other book brings together as much information and documentation on the airborne Of special interest to the veterans who took part in the great paratroop and glider movements this book will become invaluable to students of aerial warfare and of World War II      *Out of the Blue* James Alvin Huston, 1981      US World War II Parachute Infantry Regiments Gordon L. Rottman, 2014-01-20 The parachute infantry regiments were among the most highly decorated US Army units of World War II and between them they saw action right across the world The elite nature of these units led to them being committed to action not only in the way that had been intended their quality tempted commanders to keep them in the line longer than their light armament justified and they were tested to the limit This engaging study traces the story of each of the 17 regiments from their creation and training in the USA through their deployments overseas to their combat jumps and all their battles The book is illustrated with wartime photographs many previously unpublished and eight full colour plates detailing the specifics of their uniforms insignia and equipment practices which often differed from unit to unit      *Daily Life of U.S. Soldiers* Christopher R. Mortenson, Paul J. Springer, 2019-06-14 This ground breaking work explores the lives of average soldiers from the American Revolution through the 21st century conflicts in Afghanistan and Iraq What was life really like for U S soldiers during America s wars Were they conscripted or did they volunteer What did they eat wear believe think and do for fun Most important how did they deal with the rigors of combat and coming home This comprehensive book will answer all of those questions and much more with separate chapters on the American Revolution the War of 1812 the Mexican American War the Civil War the Indian Wars the Spanish American War World War I World War II in Europe World War II in the Pacific the Cold War the Korean War the Vietnam War the Persian Gulf War the Afghanistan War and War on Terror and the Iraq War Each chapter includes such topical sections as Conscription and Volunteers Training Religion Pop Culture Weaponry Combat Special Forces Prisoners of War Homefront and Veteran Issues This work also examines the role of minorities and women in each conflict as well as delves into the disciplinary problems in the military including alcoholism drugs crimes and desertion Selected primary sources bibliographies and timelines complement the topical sections of each chapter      The U.S. Army and World War II Judith Bellafaire, 1998 The U S Army and World War II is an anthology of selected papers from three international conferences held in 1990 1992 and 1994 on the Army s role in the war Taking the best from those meetings Judith L Bellafaire has organized the various presentations into four thematic categories prewar planning the home front the European theater and the Asian Pacific theaters reflecting the diversity of both the war and the

interest of those seeking to understand its many facets In these carefully edited papers one will find the more conventional treatments of doctrine strategy and operations side by side with those focusing on military mobilization and procurement race and gender psychological warfare and large scale advice and assistance programs Despite significant changes in military technology and the geopolitical landscape of the world since those desperate times the human problems highlighted by the authors are not much different from many of those facing Army leaders today Although the past can never provide the specific recipes needed for the future experience has shown that both the basic ingredients and the manner in which they are prepared and processed have remained remarkably constant Those grappling with the challenges of stability operations and other contingency missions in support of the Global War on Terrorism will find this collection of readings invaluable

**World War II: the Encyclopedia of the War Years, 1941-1945** Norman Polmar, Thomas B. Allen, 2012-08-15 This authoritative and comprehensive survey features over 2 400 entries Subjects range from battles soldiers and military activities to politics culture and the Holocaust Enlivened by 85 illustrations its panoramic perspective encompasses WWII s enduring influences on the American way of life A unique and valuable look at the war General James Doolittle US Army Paratrooper in the Pacific Theater 1943-45 Gordon L. Rottman, 2012-11-20 The two major Army units that operated in the Pacific the 11th Airborne Division and the 503rd Parachute Regimental Combat Team PRCT launched small scale operations on extremely difficult if not outright dangerous terrain while also conducting amphibious assaults fighting on jungled hills swamps and mud The two units were very different with the 503rd PRCT being reserved for special purpose missions and the 11th Airborne Division occupying a more traditional role This title will deal with the background to these two units and their training before detailing the specific equipment used in the theatre and finally and most importantly the combat experience at a personal level of the US Army Paratrooper in the Pacific The China-Burma-India Campaign, 1931-1945 Eugene L. Rasor, 1998-03-19 The China Burma India campaign of the Asian Pacific war of World War II was the most complex if not the most controversial theater of the entire war Guerrilla warfare commando and special intelligence operations and air tactics originated here The literature is extensive and this book provides an evaluative survey of that vast literature A comprehensive compilation of some 1 500 titles the work includes a narrative historiographical overview and an annotated bibliography of the titles covered in the historiographical section Following an introductory historical essay and a chronology the historiographical narrative covers land water underwater air and combined operations intelligence matters diplomacy and logistics and supply It also examines the memoirs diaries autobiographies and biographies of the personnel involved Such cultural topics as journalism fiction film and art are analyzed and existing gaps in the literature are looked at The bibliography provides both descriptive and evaluative annotations *Hitler Triumphant* Peter G. Tsouras, 2011-08-22 Edited by the author of *Disaster at D Day* a collection of alternative histories that force readers to consider what could happen if the Nazis won World War II Based on a series of fascinating what ifs posed by leading military historians this compelling new

alternate history reconstructs the moments during the Second World War that could conceivably have altered the entire course of the war and led to a German victory Based on real battles actions and characters each scenario has been carefully constructed to reveal how at points of decision a different choice or minor incident could have set in motion an entirely new train of events altering history forever Scenarios in this volume include the fall of Malta in 1942 and the likely consequences and the possibility of Halifax making peace with Hitler Contributors include John Prados editor of The White House Tapes Eavesdropping on the President David Isby editor of Fighting the Invasion and The Luftwaffe Fighter Force and Nigel Jones author of The War Walk and Rupert Brooke Life Death and Myth Praise for Hitler Triumphant An entertaining work of counterfactual history with some thought provoking material on the overall course of the war History of War The analysis of battle strategy and military might makes for a top pick for military readers seeking more than fantasy speculation Midwest Book Review

Dille,2013-09-30 The array of new technologies that came on the scene in the early 20th century resulted in widely varied new forms of military special operations once civilization embarked on its greatest war Suddenly fighting men could be delivered by parachute submarine glider jeeps and fast amphibious craft deep into enemy territory to perform special tasks yet others would continue to perform missions the same as their ancestors in previous wars on foot using stealth endurance and patience This work contains discussions of the employment of various special purpose special mission organizations during World War II These units operated in Allied and Axis countries and in

various theaters of war including Europe North Africa the Pacific Asia and the continental United States Representing every major combatant the operations include various kinds of raids intelligence gathering missions support to partisan guerrilla groups prisoner rescues direct action missions and at least two where the object was simply to steal something Some missions would have been officially denied if the operations had been caught in the act The book is divided into two sections Behind Enemy Lines and Behind Friendly Lines to demonstrate that special purpose organizations can be employed wherever needed even in areas controlled by military units of their own or allied countries Many of the units described run the gamut of special mission types from commando to parachute units reconnaissance to sabotage units and partisan training units as well as those with combined missions Many of the operations described in this book continue to serve as templates for modern Special Operations missions while still others the first attempts of their kind continue to serve as examples of what not to try under the circumstances Michael F Dille served for 20 years in the U S Army s Military Intelligence branch After retiring from the Army the author served for about ten years as an employee of the Department of Defense then as a contractor for various U S Government agencies in several fields for 15 years Author of several books and many articles a number of these chapters are based on his previous writings for the legendary Behind the Lines magazine *Gliders of World War II: 'The Bastards No One Wanted'* Major Michael H.
