**Hacking Education in a Digital Age** Bryan Smith, Nicholas Ng-A-Fook, Linda Radford, Sarah Smitherman Pratt, 2018-04-01 In this collection the authors put forth different philosophical conceptions of hacking education in response to the educational societal and technological demands of the 21st century Teacher Educators are encouraged to draw on the collection to rethink how

hacking education can be understood simultaneously as a praxis informed by desires for malice as well as a creative site for us to reconsider the possibilities and limitations of teaching and learning in a digital era How do we hack beyond the limits of circumscribed experiences regulated subjective encounters with knowledge and the limits imposed by an ever constrained 21st century schooling system in the hopes of imagining better and more meaningful futures How do we foster ingenuity and learning as the end itself and not learning as economic imperative in a world where technology in part positions individuals as zombie like and as an economic end in itself Can we hack education in such a way that helps to mitigate the black hat hacking that increasingly lays ruin to individual lives government agencies and places of work How can we as educators facilitate the curricular and pedagogical processes of reclaiming the term hacking so as to remember and remind ourselves that hacking's humble roots are ultimately pedagogical in its very essence As a collection of theoretical and pedagogical pieces the chapters in the collection are of value to both scholars and practitioners who share the same passion and commitment to changing challenging and reimagining the script that all too often constrains and prescribes particular visions of education Those who seek to question the nature of teaching and learning and who seek to develop a richer theoretical vocabulary will benefit from the insightful and rich collection of essays presented in this collection In this regard the collection offers something for all who might wish to rethink the fundamental dynamics of education or as Morpheus asks of Neo in The Matrix bend the rules of conventional ways of knowing and being

**Common Circuits** Luis Felipe R. Murillo, 2025-02-25 How hackers facilitate community technology projects that counter the monoculture of big tech and point us to brighter innovative horizons A digital world in relentless movement from artificial intelligence to ubiquitous computing has been captured and reinvented as a monoculture by Silicon Valley big tech and venture capital firms Yet very little is discussed in the public sphere about existing alternatives Based on long term field research across San Francisco Tokyo and Shenzhen Common Circuits explores a transnational network of hacker spaces that stand as potent but often invisible alternatives to the dominant technology industry In what ways have hackers challenged corporate projects of digital development How do

hacker collectives prefigure more just technological futures through community projects Luis Felipe R Murillo responds to these urgent questions with an analysis of the hard challenges of collaborative autonomous community making through technical objects conceived by hackers as convivial shared technologies Through rich explorations of hacker space histories and biographical sketches of hackers who participate in them Murillo describes the social and technical conditions that allowed for the creation of community projects such as anonymity and privacy networks to counter mass surveillance community made monitoring devices to measure radioactive contamination and small scale open hardware fabrication for the purposes of technological autonomy Murillo shows how hacker collectives point us toward brighter technological futures a renewal of the digital commons where computing projects are constantly being repurposed for the common good

**Consuming Youth** Robert Latham,2007-11-01 From the novels of Anne Rice to The Lost Boys from The Terminator to cyberpunk science fiction vampires and cyborgs have become strikingly visible figures within American popular culture especially youth culture In Consuming Youth Rob Latham explains why showing how fiction film and other media deploy these ambiguous monsters to embody and work through the implications of a capitalist system in which youth both consume and are consumed Inspired by Marx s use of the cyborg vampire as a metaphor for the objectification of physical labor in the factory Latham shows how contemporary images of vampires and cyborgs illuminate the contradictory processes of empowerment and exploitation that characterize the youth consumer system While the vampire is a voracious consumer driven by a hunger for perpetual youth the cyborg has incorporated the machineries of consumption into its own flesh Powerful fusions of technology and desire these paired images symbolize the forms of labor and leisure that American society has staked out for contemporary youth A startling look at youth in our time Consuming Youth will interest anyone concerned with film television and popular culture
