H. Butler, Taija Torvela, Laura M. Burek, Colin D. Prosser, 2008 This book is the first to describe the history of geoconservation It draws on experience from the UK Europe and further afield to explore topics including what is geoconservation where when and how did it start who was responsible and how has it differed across the world Geological and geomorphological features processes sites and specimens provide a resource of immense scientific and educational importance They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many of the great tourism destinations Mankind's activities including contributing to enhanced climate
