Savigliano,Hannah Schwadron,2025-03-12 Funny Moves Dance Humor Politics explores the intersection of dance and humor and the political stakes that bodies incur when they dare to be both aestheticized and funny The editors posit that funny moves are dance s Other the missteps or oversteps that don t fit a particular dance form Funniness in dance whether gleeful surprising or odd causes disruptions which may be progressive or conservative inciting pleasures that counterbalance the artform s often serious codes Writing from Latin America the Caribbean South Asia Europe and the United States the book s ten authors provide diverse observational techniques and creative vocabularies for finding analyzing and theorizing funny moves across dance forms dance scenes and dance screens Some of the authors find hope in the laughter of their artist subjects and their audiences and some linger in the ambiguity and confusion so created Each essay takes on a single surprise factor or a choreographic comic rupture relishing in the amassed effects or affects across an absurdist cinematic staged or quotidian sequence What is funny in each case pops up as a wildcard that evokes recognizable shared experiences sometimes pushing back against dominant or mainstream logic and its supremacist laughter     **Active Experiments in Space: Past, Present, and Future** Gian Luca Delzanno,Joseph Eric Borovsky,Evgeny V. Mishin,2020-07-10     **Low-Frequency Waves in Space Plasmas** Andreas Keiling,Dong-Hun Lee,Valery Nakariakov,2016-04-04 Low frequency waves in space plasmas have been studied for several decades and our knowledge gain has been incremental with several paradigm changing leaps forward In our solar system such waves occur in the ionospheres and magnetospheres of planets and around our Moon They occur in the solar wind and more recently they have been confirmed in the Sun s atmosphere as well The goal of wave research is to understand their generation their propagation and their interaction with the surrounding plasma Low frequency Waves in Space Plasmas presents a concise and authoritative up to date look on where wave research stands What have we learned in the last decade What are unanswered questions While in the past waves in different astrophysical plasmas have been largely treated in separate books the unique feature of this monograph is that it covers waves in many plasma regions including Waves in geospace including

ionosphere and magnetosphere Waves in planetary magnetospheres Waves at the Moon Waves in the solar wind Waves in the solar atmosphere Because of the breadth of topics covered this volume should appeal to a broad community of space scientists and students and it should also be of interest to astronomers astrophysicists who are studying space plasmas beyond our Solar System **Global Governance of Space Cyber Security** Du Li, 2024-11-25 The book explores the

regulatory and institutional aspects of global governance of space cybersecurity Focusing on the regulatory aspects this book argues that the current international law cannot handle the threats posed by malicious cyber and space activities as regulatory gaps exist owing to terminological ambiguities and legal loopholes A law making process in the space field is proposed with a focus on developing soft law instruments through multistakeholder platforms To enhance the implementation and enforcement of laws concerning space cybersecurity it is crucial to emphasise the roles of international organisations and industries Furthermore empowering existing international institutions with supervisory powers and promoting national legislation and domestic judicial systems are feasible approaches to enhance compliance with the law The book will attract international law scholars especially those studying space law and cyber law The Works of the British
