**Outgrowing the Earth** Lester R. Brown, 2012-04-27 Historically food security was the responsibility of ministries of agriculture but today that has changed decisions made in ministries of energy may instead have the greatest effect on the food situation Recent research reporting that a one degree Celsius rise in temperature can reduce grain yields by 10 per cent means that energy policy is now directly affecting crop production Agriculture is a water intensive activity and while public attention has focused on oil depletion it is aquifer depletion that poses the more serious threat There are substitutes for oil but none for water and the link between our fossil fuel addiction climate change and food security is now clear While population growth has slowed over the past three decades we are still adding 76 million people per year In a world where the historical rise in land productivity has slowed by half since 1990 eradicating hunger may depend as much on family planners as on farmers The bottom line is that future food security depends not only on efforts within agriculture but also on energy policies that stabilize climate a worldwide effort to raise water productivity the evolution of land efficient transport systems and population policies that seek a humane balance between population and food *Outgrowing the Earth* advances our thinking on food security issues that the world will be wrestling with for years to come *Outgrowing the Earth* Lester Russell Brown, Earth Policy Institute, 2004 Historically food security was the responsibility of ministries of agriculture but today that has changed Recent research reporting that a 1 degree Celsius rise in temperature can reduce grain yields by 10 percent means that energy policy is now directly affecting crop production Decisions made in ministries of energy may have a greater effect on future food security than those made in ministries of agriculture The bottom line is that future food security depends not only on efforts within agriculture but also on energy policies that stabilize climate a worldwide effort to raise water productivity the evolution of land efficient transport systems and population policies that seek a humane balance between population and food *Outgrowing the Earth* advances our thinking on food security issues that the world will be wrestling with for years to come BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **OUTGROWING THE EARTH - The Food Security Challenge in - an Age of Falling Water Tables ,**

Full Planet, Empty Plates: The New Geopolitics of Food Scarcity Lester R. Brown, 2012-10-01 Food is the new oil Land is the new gold The world food situation is deteriorating Grain stocks have dropped to a dangerously low level The World Food Price Index has doubled in one decade The ranks of the hungry are expanding political unrest is spreading On the demand side of the food equation there will be 219 000 people at the dinner table tonight who were not there last night And some 3 billion increasingly affluent people are moving up the food chain consuming grain intensive livestock and poultry products At the same time water shortages and heat waves are making it more difficult for farmers to keep pace with demand As grain exporting countries ban exports to keep their food prices down importing countries are panicking In response they are buying large tracts of land in other countries to grow food for themselves The land rush is on Could food become the weak link for us as it was for so many earlier civilizations Lester Brown one of the leading environmentalists of our time explains why world food supplies are tightening and tells what we need to do about it **History of Soybeans and Soyfoods in South America (1884-2009): Extensively Annotated Bibliography and Sourcebook** William Shurtleff, Akiko Aoyagi, 2009 *History of Soybeans and Soyfoods in China and Taiwan, and in Chinese Cookbooks, Restaurants, and Chinese Work with Soyfoods Outside China (1024 BCE to 2014)* William Shurtleff, H.T. you or I could walk freely about and explore It is not entirely clear that this high goal of terraforming can ever be achieved however and consequently throughout much of this book the terraforming idea that are discussed will apply to the goal of making just some fraction of a world habitable In other cases the terraforming described might be aimed at making a world habitable not for humans but for some potential food source that of course could be consumed by humans The many icy moons that reside within the Solar System for example may never be ideal locations for human habitation but they present the great potential for conversion into enormous hydroponic food producing centers The idea of transforming alien worlds has long been a literary backdrop for science fiction writers and many a make believe planet has succumbed to the actions of direct manipulation and the indomitable grinding of colossal machines Indeed there is something both liberating and humbling about the notion of transforming another world it is the quintessential eucatastrophy espoused by J R R Tolkien the catastrophe that ultimately brings about a better world When oxygen was first copiously produced by cyanobacterial activity on the Earth some three billion years ago it was an act of extreme chemical pollution and a eucatastrophy The original life nurturing atmosphere was eventually changed forever but an atmosphere that could support advanced life forms came about

**EcoCities** Richard Register, 2006-04-01 Most of the world s population now lives in cities So if we are to address the problems of environmental deterioration and peak oil adequately the city has to be a major focus of attention EcoCities is about re building cities and towns based on ecological principles for the long term sustainability cultural vitality and health of the Earth s biosphere Unique in the literature is the book s insight that the form of the city really matters and that it is within our ability to change it and crucial that we do Further that the ecocity within its bioregion is comprehensible and do able and can produce a healthy and potentially happy future EcoCities describes the place of the city in evolution nature and history It pays special attention to the key question of accessibility and transportation and outlines design principles for the ecocity The reader is encouraged to plunge in to its economics and politics the kinds of businesses planning and leadership required The book then outlines the tools by which a gradual transition to the ecocity could be accomplished Throughout this new edition is generously illustrated with the author s own inspired visions of what such rebuilt cities might actually look like

**Outgrowing Church, Second Edition** John Killinger, 2019-10-23 Why are so many people drifting away from today s churches John Killinger suggests that part of the problem is that they have personally outpaced the thinking and understanding of the church so that they no longer find it adequate as a social structure for the celebration of their faith In their attempts to find Jesus and his teachings relevant within the new culture they strike out on their own or adhere to para Christian organizations that retain an allegiance to Jesus without the baggage of the traditional institution Killinger a former big steeple minister and theologian describes how he himself has been forced essentially to abandon the church in order to remain faithful to the beliefs and ideals that first
