The Dialectics of Capital (volume 1) Thomas T. Sekine, 2021-11 The single most important work in English to build on the theory of Japanese economist K z Uno

Outline of the Dialectic of Capital Thomas T. Sekine, 1997 The Dialectic of Capital (2 Vols.) Thomas Sekine, 2020-07-13 This is the first book written in English that tries to expose the thing in itself or inner logic of capitalism in a form homomorphic to Hegel's Logic following the method previously established in Japan by K z Uno 1987 1977 Neither bourgeois liberal nor even conventionally Marxist economics possess a logical hence objective knowledge of capitalism as such which is regrettable The manuscript of this book was completed in typescript at York University Canada in 1983 then privately published in that form by the author in about 500 copies which are by now virtually dispersed In order however to re launch economics as objective knowledge when

the world must prepare itself to correctly terminate capitalism we need to rediscover a book of this kind as a dependable guide

Dialectics and Deconstruction in Political Economy R. Albritton, 1999-06-08 Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser Original reinterpretations of thinkers including Hegel Weber Althusser Derrida and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction drawing upon insights from philosophy sociology political science and critical theory Finding a non essentialist way of using the immense cognitive power of dialectics accepting a limited deconstruction but challenging further deconstructionist directions represents a major breakthrough for political economy

Exit from Globalization Richard Westra, 2014-10-24 Exit from Globalization moves from theory to practice from questions of where incorrigible knowledge of substantive economic life derives and how that knowledge is put towards making a progressive redistributive eco sustainable future of human flourishing Westra discards at the outset views that the root of current economic ills is the old devil we know capitalism Rather he maintains the neoliberal decades spawned a Merchant of Venice economic excrescence bent upon expropriation and rent seeking which will scrape all the flesh from the bones of humanity if not stopped dead in its tracks En route to providing a viable design for the human future in line with transformatory demands of socialists and Greens Westra exorcizes both Soviet demons and ghosts of neoliberal ideologues past which lent support to the position that there is no alternative to the market Exit from Globalization shows in a clear and compelling fashion that while debates over the possibility of another potentially socialist world swirl around this or that grand society wide scheme the fact is that creative future directed thinking has at its disposal several economic principles that transformatory actors may choose from and combine in various ways to remake human economic life The book concludes with an examination of the various social constituencies currently supporting radical change and explores the narrowing pathways to bring change about

New Dialectics and Political Economy R. Albritton, J. Simoulidis, 2002-11-29 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization freedom inflation and subjectivity

An Outline of The Dialectic of Capital: The doctrine of production: The production-process of capital Thomas Tomohiko Sekine, 1997

Unleashing Usury Richard Westra, 2016-04-03 Usury laid medieval society to waste Western civilization was saved by the rise of capitalism which tamed the activities of money lending and endowed them with socially redeeming value tethering finance to expanding production of material goods and increased social wealth Now as the 21st century begins bloating tides of money with no possibility of ever being converted into real capital wash over the world Finance again has turned to its dark side using money to make money with no

socially redeeming purpose Such is the endgame of economies managed by capitalists without capitalism As Marx foresaw capitalist society like all others is destined to be outpaced by history as the conditions of its existence decompose and become a drag on the human future Either we will succeed in bringing about new politico economic structures or civilization will collapse into barbarism just as usury broke it down in the past Marx's Concept of the Alternative to Capitalism Peter Hudis,2012-07-25 This is the first book length study of Marx s concept of the alternative to capitalism It shows that his critique of capital flowed from a commitment to a specific vision of the kind of human relations that define a new society

The Spectre of Capital: Idea and Reality Christopher J. Arthur,2022-07-18 What is money What is capital The Spectre of Capital tackles such fundamental questions at a deep philosophical level It argues that the modern world is ruled by a spectre the spectre of capital This insight is rooted in an original combination of the ideas of Marx and Hegel It presents the most sophisticated argument to date for the homology thesis namely that the order of Hegel s logical categories and that of the social forms addressed by Marx s Capital share the same architectonic The systematic dialectical presentation shows how capital becomes a self sustaining power *The Types of Economic Policies under Capitalism* Uno Kōzō,2017-06-01 Uno who proposes to study capitalism at three distinct levels of abstraction insists that there should be a mid range theory of its developmental stages danka ron between the pure theory of capital which must be couched in the form of Hegelian dialectic genriron and capitalist histories which must be recounted with full empirical detail In this book he illustrates how he would himself expose that mid range theory by summarising the three types of economic policy that the bourgeois state successively adopted mercantilism liberalism and imperialism He moreover indicates that economics can relate and cross fertilise with other branches of social science such as law and politics only at this level of abstraction thus achieving an adequate theory of the bourgeois state Nowhere else is Marx s insight into the state as the epitome of bourgeois society more vividly endorsed than in this book First published in Japanese as Keizai Seisakuron by Kobundo Ltd in 1936 The current work is a translation of the enlarged and revised edition of 1971 *Turbulence and New Directions in Global Political Economy* J. Busumtwi-Sam,L. Dobuzinskis,2002-11-26 James Busumtwi Sam and Laurent Dobuzinskis have assembled a leading team of experts in the field to examine how phenomena associated with globalization impact on political economy in theory and in practice The volume employs a variety of theoretical and analytical approaches to examine the very changeable nature of the global political economy in terms of academic analysis policy and practice Socialist Dilemmas Henryk Flakierski,Thomas T. Sekine,2019-07-26 This book consisting of eight related articles deals with several dimensions of socialism in the 1980s just before the beginning of the great changes which took place in Eastern Europe Profound changes in the political economy of the world in the 1970s led to a decline of over confidence and over optimism characteristic of the earlier times both in the West and in the East The painful experience of stagnation ended the grand Keynesian dream and led to the return of neo conservatism in the West The disappointing pace of industrial and technological progress during the Brezhnev era and

increasing shortages of productivity of communism in the East With both sides in the grip of political and economic uncertainties the ideological confrontation seemed to have lost much of its sharp edge No longer did the accepted dogmas and ideologies of the past appear either valid or convincing The presupposition of the debate on comparative economic systems were in need of fundamental revisions It was in this perspective that the Political Economy Workshop at York University undertook to feature a series of lectures on socialism in its 1988 sessions Of about a dozen presentations by York University scholars and invited speakers eight were subsequently made available in the form of articles and are published in this volume These articles cover a wide range of issues both theoretical and practical and from both the Western and the Eastern perspective It is recognized by all authors that neither the East European experiments in communism nor the Western process into social democracy have been a great success The clue to what might lie beyond the socialist dilemmas in the age of perestroika will be found only by going through once again to the circumstances which led to the failure of socialism thus far *The Hegel-Marx Connection* T. Burns, I. Fraser, 2000-07-19 A major and timely re examination of key areas in the social and political thought of Hegel and Marx The editors extensive introduction surveys the development of the connection from the Young Hegelians through the main Marxist thinkers to contemporary debates Leading scholars including Terrell Carver Chris Arthur and Gary Browning debate themes such as the nature of the connection itself scientific method political economy the Hegelian basis to Marx's Doctoral Dissertation human needs history and international relations

Marx's Capital, Method and Revolutionary Subjectivity Guido Starosta, 2015-11-24 In Marx's Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i.e. capital is to develop as its own immanent determination the constitution of the self abolishing working class as a revolutionary subject A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content Revitalizing Causality Ruth Groff, 2007-12-18 This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms or powers in the context of offering a causal explanation A unique collection it offers the reader various disciplinary and inter disciplinary divides helping to stake out a new neo Aristotelian position within contemporary debate *Economics, Science and Capitalism* Richard Westra, 2021-12-19 Various strains of heterodox economics have sought and largely failed to dismount orthodoxy from its dominant position This book critiques the critics explaining why heterodox economics challenges have faltered and then presents a coherent alternative paradigm of its own This simultaneously exposes the vacuousness of neoclassical economics the limitations of heterodox critique and the

subverting of Karl Marx's revolutionary economic thought by his own disciples. The book draws in particular on two key intellectual traditions in making its arguments: critical realism and Marxism. From the refounding of critical realist philosophy of science in the hands of Roy Bhaskar, emphasis is placed upon the position that the ontological nature of the object of study determines the form of its possible science. However, in their theoretical constructions, neither orthodox economics nor heterodox economics problematizes the unique ontology of capitalism to the detriment of knowledge about the social world. The book maintains that a century of misthinking over Marx's corpus has resulted in a missed opportunity to construct a paradigmatic alternative to orthodox economics. Drawing upon the tradition of the Japanese Uno approach to Marxism and supported by Bhaskar's development of critical realism as underlaborer for science, the book defends Marx's writing in his monumental *Capital* as founding an economic science adequate to its ontological object of study. It then elaborates upon how Marxian economic theory exposes the hidden scourges of capitalism and what is required to unleash the potential of this theory for comprehensive analysis of capitalist vicissitudes, the study of economic life in precapitalist societies, and the design of a desperately needed postcapitalist social order. Broadening its appeal as it sets out to reclaim Marx's revolutionary legacy, this original volume critically traverses writings in mainstream and heterodox economics, cutting edge philosophy of science, and Marxian political economy, and introduces readers to a reconstruction of Marx's *Capital* engineered in Japan. This provocative book is essential reading for everyone interested in heterodox economics, critical realism, Marxian economics, and critiques of capitalism.
