

# A Brief History of Music Recording

## Graphophone

Very raw almost inaudible recordings created by Thomas Edison who used electro-magnetic fields to carve into a wax cylinder.

## The LP Record

Electro Magnetic recording developed by the Germans During World War. It was quickly adopted by the Americans resulting in Tape Recordings. During this time FM and AM radios were a household item and LP's were released by CBS in 1948.

## Cassette Tape

Cassette tapes were created before the 8-track but was not very popular due to its lo-fi quality. In 1970 the cassette tape was allowing for the first type of home recording. 1977-78 the first walkman was introduced. The mid 80's saw the cassette tape overtake the sales of LP's.

1876

1920's

1948

1970

1985

2005

## Electrical Recording

Columbia Records experimented with new ways to record sound and music. They partnered with Western Electric Company in the mid 1920's. They came up with a way to record using amplified driven electromagnetic cutting heads to create a disk.

## 8 Track

Advances in studio tricks and technology allowed for the development of stereo recordings which allowed for a more natural way of listening to music. The rise in automobile sales in the 50s to 60s inspired innovation to create the 8-track player in 1965 so drivers could listen to music easier during their commutes.

## Digital Recordings

Phillips and Sony were creating a way to record with a laser onto a reflective disk in the 80's within a few years the recordings developed from analogue lasers to digital recordings. The first compact disks were released in 1982-83. Many variations occurred with the CD and Digital tape market until the mid 2000s.

## The iPod

The iPod and iTunes were created in 2001 but didn't really catch on till about 2004 when the technology met the design in a perfect way. This design of the iPod lasted until about 2007 when the first iPhone was released.
