Neighborhood Resilience and Urban Conflict Karina V. Korostelina,2021-10-21 This book explores the resilience in urban neighborhoods affected by chronic conflict and violence developing a new model for improving resilience policies The neighborhood resilience approach is an inclusive form of building positive resilience which recognizes that local communities possess valuable skills and experience of dealing with crises and prioritizes the agency of local communities in the production

of knowledge and developing practices The book identifies and describes the repertoire of neighborhood resilience practices organized in four clusters 1 addressing the structure of conflict 2 increasing the effectiveness of external resources 3 enhancing the community capacities and 4 reflecting the dynamics of identity and power in neighborhoods One of the key findings of the book is the nonlinear connections between structure and dynamics of conflict and neighborhood resilience practices represented in the Four Loops Model The concentration on community based practices addresses macro level critiques of neo liberalism in critical resilience studies and encourages rethinking the ways community based indicators might operate in combination with existing macro indicators of resilience The bottom up indicators provide more specific details and essential localized experiences for improving resilience policies at the national level This book will be of much interest to students of conflict resolution resilience urban studies and US politics **Christianity Today** Carl Ferdinand Howard Henry, 1981 A fortnightly magazine of evangelical conviction **Genesis** Marilyn Kunz, Catherine Schell, 1990-05
