The European Integration Crisis Marek Loužek, Luboš Smrčka, 2020-12-21 European integration is not a priori positive or negative it results from the interaction between various interests During the past few years however it has been impossible to ignore increasingly strident claims that the European Union is in the midst of a crisis According to this perspective European institutions do not function well democracy in the Union is flawed eurozone problems have reached a critical point and inward migration which European institutions seem incapable of handling is escalating This book demonstrates that public choice theory can be a suitable analytical tool to examine the European integration process It is based on the assumption that consumers politicians and even nations are similarly concerned with their own interests economic political and so on Public choice theory enables us to de idealize the European integration process and see the interests of individual actors in the process more realistically European integration does not occur because the actors are altruistic rather it comes about due to their rational pursuit of individual or group self interests European integration and other forms of globalization are not irreversible For every action there is an equal and opposite reaction It remains a possibility that after several decades of European integration we are now entering an era of disintegration This book will serve as a source of edification for academics politicians students and experts as well as the general public It is designed to capture the interest of both graduate and postgraduate students of economics political science and international relations

The Politics of European Union Enlargement Frank Schimmelfennig, Ulrich Sedelmeier, 2005-11-16 This is a key reference text presenting the latest first rate approaches to the study of European enlargement Developed and significantly expanded from a special issue of the leading Journal of European Public Policy this new volume draws on the insights from the recently emerging theoretically informed literature on the EU s eastern enlargement and complements these studies with original articles that combine a theoretical approach with comparative analyses These expert contributors focus on the broader theoretical debates and their implications for the enlargement of the EU as well as placing the enlargement of the EU within the broader context of the expansion of international organisations and the study of institutions in international relations

Globalisation and Enlargement of the European Union Andreas Bieler, 2002-11-01 On January 1 1995 Austria and Sweden joined the European Union EU This book examines why these two countries joined at such a moment and studies their accession against the structural background of globalization In this cutting edge analysis Andreas Bieler argues that conventional neo functionalist and intergovernmentalist theories fail to explain such structural change as they take existing power structures as given

Therefore he develops a neo Gramscian perspective as an alternative approach to European integration Foreign Direct Investment and Strategic Alliances in Europe Hong Liu, 2018-10-24 Advance your business interests in the ever changing European market Foreign direct investment FDI and strategic alliances are among the most popular modes of international market entry and expansion in major markets by multinationals This informative book uses case examples a wide ranging survey and the expertise of authorities in the field to shed light on the when why and how of investing and forming alliances in the volatile environment of the European market Providing both theoretical background and fascinating case studies Foreign Direct Investment and Strategic Alliances in Europe begins with an examination of the relationship between contextual and strategic factors and foreign market entry strategies Then it illustrates its meaning with a real world application of that information in this case examining the way Israeli manufacturers developed their entry strategies in the European Union This insightful book also analyzes the market entry development and expansion of the Coca Cola company in Russia discusses strategic problems barriers to expansion and first versus late mover advantages in Russia s transition economy looks at the relationship between United States software firms and European companies provides guidelines for choosing what form a strategic alliance should take presents a survey of 114 international strategic alliances between firms in the United Kingdom and their European American and Japanese partners Strategic alliances and foreign direct investment are expected to continue to flourish in Europe By integrating FDI issues with those of strategic alliances this well referenced book will provide you with insights into both areas as well as up close perspectives on specific segments of the European market **Paradoxes of European Foreign Policy** Jan Zielonka, 2023-09-29 The European Union s foreign policy is full of paradoxes The Union aspires to be a powerful international actor without becoming a super state It hopes to prevent and manage conflicts but refrains from acquiring the military means to do so It embarks on the project of widening its borders but continues its deepening project which makes the entrance hurdles for applicant countries ever higher It wishes to maintain strong transatlantic links but continues to build institutions that make the EU more independent from if not competitive with the United States In this stimulating book distinguished European and American intellectuals offer solutions to imperative but unanswered questions How can the Union s enormous normative power of attraction combined with its operational weakness be explained Can the Union remain a civilian power when coping with an uncivilized world Can a European foreign policy get off the ground without prior emergence of a European demos Are national policies within the Union increasingly convergent or divergent And how can the Union s international performance be assessed Rethinking European Integration History in Light of Capitalism Aurélie D. Andry, Emmanuel Murlon-Druol, Haakon A. Ikonomou, Quentin Jouan, 2022-06-01 This book outlines the possibilities and perspectives of an intertwining of European integration historiography with the history and concept of capitalism Although debates on capitalism have been making a comeback since the 2008 crisis to date the concept of capitalism remains almost completely avoided by historians of European

integration This book thus conceptualizes capitalism as a useful analytical tool that should be used by historians of European integration and proposes three major approaches for them to do so first by bringing the question of social conflict integral to the concept of capitalism into European integration history second by better conceptualizing the link between European governance Europeanization and the globalization of capitalism and thirdly by investigating the economic political and ideological models or doctrines that underlie European cooperation integration policies and institutions This analytical encounter between European integration history and capitalism allows for a better understanding of how today s Europe resulted from a complex social economic and political conflict that took place in part at the European level The chapters in this book were originally published as a special issue of the journal the European Review of History

and impact of European integration *Differentiated Integration in the European Union* Benjamin Leruth, Christopher Lord, 2017-10-02 The notion of Differentiated Integration is increasingly used in the literature on European integration Often employed interchangeably with the notion of flexible integration diverging views on its nature have led to the emergence of various definitions and to some extent a semantic confusion A lack of consensus characterizes the academic literature some authors even avoid putting an explicit definition on the term The main objective of this book is to seek answers for the following questions How can one define Differentiated Integration in the European Union Should Differentiated Integration be considered as a process a concept a system or a theory Should it be seen as a temporary or a well established phenomenon How is this field of study likely to develop in the future In order to do so all chapters written by leading experts in the field offer a state of the art analysis of the study of differentiated integration from theoretical and practical perspectives In addition this book is not a collection of isolated papers all chapters are interconnected and gravitate towards the aforementioned central questions but approach these from different perspectives This book was published as a special issue of the Journal of European Public Policy *The Logic of Regional Integration* Walter Mattli, 1999-05-20 In the late 1980s regional integration emerged as one of the most important developments in world politics It is not a new phenomenon however and this 1999 book presents an analysis of integration across time and across regions Walter Mattli examines projects in nineteenth and twentieth century Europe but also in Latin America North America and Asia since the 1950s Using the tools of political economy he considers why some integration schemes have succeeded while many others have failed what forces drive the process of integration and under what circumstances outside countries seek to join Unlike traditional political science approaches the book stresses the importance of market forces in determining the outcome of integration but unlike purely economic analyses it also highlights the impact of institutional factors The book will provide students of political science economics and European studies with a framework for the study of international cooperation *The Transformation or Reconstitution of Europe* Tamara Perišin, Siniša Rodin, 2018-03-08 It is generally understood that EU law as interpreted by the ECJ has not merely reconstituted the national legal matrix at the supranational level but has also transformed Europe and shaken the well established often formalist ways of thinking about law in the Member States This innovative new study seeks to examine such a narrative through the lens of the American critical legal studies CLS perspective The introduction explains how the editors understand CLS and why its methodology is relevant in the European context Part II examines whether and how judges embed policy choices or even ideologies in their decisions and how to detect them Part III assesses how the ECJ acts to ensure the legitimacy of its decisions whether it resists implementing political ideologies what the ideology of European integration is and how the selection of judges influences these issues Part IV uses the critical perspective to examine some substantive parts of EU law rules on internal and external movement and the European arrest warrant It seeks to determine whether the role of the ECJ has really been transformative and whether

that transformation is reversible Part V considers the role of academics in shaping the narratives of EU integration The Future of Foreign Investment in Southeast Asia Frank Bartels,Nick Freeman,2012-09-10 This book explains the dynamics behind southeast Asia s foreign investment activity and looks at the region s options for reviving its reputation as an attractive host for foreign investors Each chapter focuses on a key element together they portray southeast Asia s foreign investment profile and prospects By bringing these key interlocking elements together under a single cover the book aims to provide a more profound understanding of the challenges southeast Asian countries face in their on going attempts both to attract new foreign investment inflows and to continue hosting substantial existing foreign invested assets **The External Dimension of EU Justice and Home Affairs** T. Balzacq,2009-06-25 This book provides an analysis of the European Neighbourhood Policy by focusing on the impact of norms of justice and home affairs on EU external relations Drawing on the literature of new governance it designs a framework for analysis which clarifies the contents tools and processes of the external dimension of EU justice and home affairs
