examines the treatment of science fiction within the academy The expert contributors to this volume explore a wide range of
topics related to the place of science fiction in literary studies These include academic attitudes toward science fiction the
role of journals and cultural gatekeepers in canon formation and the marginalization of specific works and authors by literary
critics In addition the volume gives special attention to multicultural and feminist concerns In discussing these topics the
book sheds considerable light on much broader issues related to the politics of literary studies and academic inquiry Cats
