Controversies in the Management of Gynecological Cancers Jonathan A. Ledermann, Carien L. Creutzberg, Michael A. Quinn, 2013-12-13 This is a novel text that highlights the controversial areas in the management of gynecological cancers None of the topics in this book have definitive answers they represent the everyday decision making facing gynecologists oncologists radiologists pathologists and other health professionals treating women with these conditions This book is not to be used as a traditional textbook it is a text that specialists and trainees will use to help them weigh up the arguments that exist in a variety of areas in the treatment of gynecological cancers Each chapter will have two or more authors selected either for their opposing views or for their ability to provide an opposite view or opinion to the other The content will be evidence based illustrating contrasting evidence and scientific opinion in the literature Each chapter will close on a summary indicating the direction of research needed to address the issues being discussed Evidence-Based Oncology Christopher B. Williams, 2008-04-15 This is a book about using the best evidence to inform treatment decisions for people with cancer It is written by oncologists for oncologists using examples throughout to illustrate key points The book starts off with a toolbox section written in a way which will help those relatively new to the principles of evidence based oncology to understand the key issues and equip them with the basics of how to tell a good study from a bad one The majority of the book then deals with an evidence based summary of the common and important cancers in a structured and easy to read format around common patient scenarios and frequently asked questions Whilst most of the evidence is based on randomised controlled trials other studies are cited where appropriate eg when discussing adverse events The unique accompanying book website will contain updates of new chapters and studies as they become available Written by leading world figures in the evidence based movement Includes free CD ROM with PC eBook and sample PDA chapter Methodology of reviewing and appraising evidence discussed in the context of cancer management Clinical sections covering prevention and screening Chapters on treatment of the individual major cancers review the current best available evidence to most frequently asked questions Rigorously structured explicit searches evidence of efficacy and harms plus comment around clinical scenarios Free access

Ovarian Cancer Samir Farghaly, 2012-02-15

Worldwide Ovarian carcinoma continues to be responsible for more deaths than all other gynecologic malignancies combined. International leaders in the field address the critical biologic and basic science issues relevant to the disease. The book details the molecular biological aspects of ovarian cancer. It provides molecular biology techniques of understanding this cancer. The techniques are designed to determine tumor genetics, expression and protein function and to elucidate the genetic mechanisms by which gene and immunotherapies may be perfected. It provides an analysis of current research into aspects of malignant transformation, growth control and metastasis. A comprehensive spectrum of topics is covered providing up to date information on scientific discoveries and management considerations.

Early Diagnosis and Treatment of Cancer Series: Ovarian Cancer E-Book Robert Bristow, Deborah Armstrong, 2015-06-08
