Borders Jagath Bandara Pathirage, 2024-10-08 This book studies how transnational migrants create a sense of home in their host countries It draws on case studies of Sri Lankan migrants living in Australia to argue that home is an existential experience rather than a fixed entity The author looks at how the sense of home arises as a fresh category which is critical in defining one's existentiality in the host society Going beyond the conventional methodological approach of an ethnographer objectivizing other's sense of home into fixed categories the book attempts to foreground the immigrant's articulation of home which evolves parallel to their being It reveals how three important aspects of our lives time space and memory intersect with the trajectories of migration The author also delves into the ways in which migrants engage in building a home as a way of creating materiality in their dwelling practice Unique and compelling the book will be highly useful in studies of diaspora globalisation and transnational migration It will be of interest to students researchers and scholars of anthropology migration and transnational studies as well as sociology and other related disciplines **Neither Settler nor Native**

Mahmood Mamdani, 2020-11-30 The nation state and the colonial state have always been the same thing the ethnic and

religious majorities of the former created only through the violent minoritization inherent in the latter Assessing cases from the United States to Eastern Europe Israel and Sudan Mahmood Mamdani suggests a radical solution the state without a nation Democracy and Revolutionary Politics Neera Chandhoke, 2015-02-26 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Democracy and political violence can hardly be considered conceptual siblings at least at first sight Democracy allows people to route their aspirations demands and expectations of the state through peaceful methods violence works outside these prescribed and institutionalized channels in public spaces in the streets in the forests and in inhospitable terrains But can committed democrats afford to ignore the fact that violence has become a routine way of doing politics in countries such as India By exploring the concept of political violence from the perspective of critical political theory Neera Chandhoke investigates its nature justification and contradictions She uses the case study of Maoist revolutionaries in India to globalize and relocate the debate alongside questions of social injustice exploitation oppression and imperfect democracies As such this is an important and much needed contribution to the dialogue surrounding revolutionary violence Insight Turkey 2017 - Spring 2017 (Vol. 19, No.2) , The Spring 2017 issue of Insight Turkey aims at analyzing some of the most debated issues during the 15 years rule of the AK Party Foreign and domestic policies political economy Turkey EU relations and the Kurdish issue are among the topics discussed in this issue Contemporary Issues in Africa's Development Ehimika A. Ifidon, Richard A. Olaniyan, 2018-04-18 This volume reports on the state of crisis in Africa in the early twenty first century Africa on the eve of the independence revolution was the continent of hope and high expectations By the third decade of independence optimism had been replaced by dismay African states had been beset by ethno political squabbles military rule civil wars Islamic and insurgent movements extreme poverty and disease With the ascent of redemocratization in the 1990s and of new pan Africanism derived from the formation of the African Union Africa appeared set to claim its vaunted destiny This book asks with hindsight to the first decade of the twenty first century how real was the renaissance in African life If the dismal African condition is a phase in the historical development of Africa this volume does not see any golden age in the past to which Africa aspires to return There is clearly a continuation and persistence of crisis with an absence of good governance personalisation of state power widespread disease and policy failure in education economy and infrastructural development Although endowed with abundant human and natural resources Africa remains the least developed and most indebted continent Whither then the African Renaissance The methodologies that underpin the contributions in this book are as diverse as the specialisations of the contributors The collection questions ideologically protected assumptions and presumptions presenting Africa as it is because it is only by knowing where Africa truly stands that a proper direction can be charted for it **Emotional Choices** Robin Markwica, 2018 This book examines coercive diplomacy and presents a theory of emotional choice to analyse how affect enters into decision making **When Men Revolt and Why** Harold J.

Bershad, 2020-03-26 The environment within which humans interact has changed dramatically since the Industrial Revolution. However, their expectations stem from the same hopes and dreams people have had from the beginning of humankind. *When Men Revolt and Why* encourages readers to look closer and more deeply into the relationships between humans and the institutions that have originated to help them realize their full potential. The contributors not only examine people but also the need to change institutions that have outworn their usefulness. When institutions inhibit rather than facilitate everyone's desire to live a full life, the result is likely to be violence. This book offers the ideas of many people who have tried to dig deeper into basic causes of violence. Included in this volume are selections by Aristotle, Tocqueville, Marx and Engels, and Brinton. The ideas they espoused still hold vitality. In his new introduction, James Davies talks about the circumstances under which this book was originally published. In Vietnam, a people were fighting for their autonomy. In the United States, many Americans were protesting against American involvement in the Vietnam War. Blacks were marching for their civil rights. Women were fighting for equality. Time has tempered these conflicts. Davies maintains that we remain ignorant of the elemental forces that impel people and nations to resort to violence. We are usually surprised by their anger and shocked by their violence. Davies asserts that we need to learn more about how humans respond to change so as to prepare ourselves for such responses to change. *When Men Revolt and Why* is as timely as ever as we deal with uncertainty in various areas of the world: the former Yugoslavia, the Middle East, and Ireland, among others. It is especially pertinent for political scientists, historians, and sociologists.
