Department of Greek and Roman Antiquities, 1921 **The Sculptures of the Parthenon** Alexander Stuart Murray, 1903 *A Catalogue of the Sculptures of the Parthenon, in the British Museum* British Museum. Department of Greek and Roman Antiquities, Arthur Hamilton Smith, 1900 **The Parthenon Sculptures** Ian Dennis Jenkins, 2007 The Parthenon sculptures in the British Museum are unrivaled examples of classical Greek art an inspiration to artists and writers since their creation in the fifth century bce A superb visual introduction to these wonders of antiquity this book offers a photographic tour of the most famous of the surviving sculptures from ancient Greece viewed within their cultural and art historical context Ian Jenkins offers an account of the history of the Parthenon and its architectural refinements He introduces the sculptures as architecture pediments metopes Ionic frieze and provides an overview of their subject matter and possible meaning for the people of ancient Athens Accompanying photographs focus on the pediment sculptures that filled the triangular gables at each end of the temple the metopes that crowned the architrave surmounting the outer columns and the frieze that ran around the four sides of the building inside the colonnade Comparative images showing the sculptures in full and fine detail bring out particular features of design and help to contrast Greek ideas with those of other cultures The book further reflects on how over 2 500 years the cultural identity of the Parthenon sculptures has changed In particular Jenkins expands on the irony of our intimate knowledge and appreciation of the sculptures a relationship far more intense than that experienced by their ancient intended spectators as they have been transformed from architectural ornaments into objects of art [The Pediments of the Parthenon](#) Palagia, 2022-12-12 This is the only comprehensive account of the Parthenon pediments in English and the first in any language since 1963 It serves as an up to date introduction to their study and includes new proposals for the restoration and interpretation of their composition Debate on the Parthenon pediments has concentrated on the interpretation of individual figures the restoration of the missing parts and the question of Roman repairs The present study is based on autopsy and considers the evidence of technical details It questions the attribution of certain familiar pieces and offers new suggestions for restoring the east pediment All sculptures are illustrated some with photographs taken especially for this book and there are new drawings of the restorations proposed by the author Chapter 1 is a general introduction to the study of the pediments It includes an assessment of the documentation and a summary of stylistic and technical characteristics of the sculptures Chapters 2 and 3 treat each pediment separately The discussion of individual sculptures is incorporated in a continuous narrative which sets them within the context of the overall composition

**Casting the Parthenon Sculptures from the Eighteenth Century to the Digital Age** Emma M. Payne, 2021-04-08

Through the 19th century as archaeology started to emerge as a systematic discipline plaster casting became a widely adopted technique newly applied by archaeologists to document and transmit discoveries from their expeditions The Parthenon sculptures were some of the first to be cast In the late 18th century and the first years of the 19th century the French artist Fauvel and Lord Elgin's men conducted campaigns on the Athenian Acropolis Both created casts of parts of the Parthenon sculptures that they did not remove and these were sent back to France and Britain where they were esteemed and displayed alongside other original sections Henceforth casting was established as an essential archaeological tool and grew exponentially over the course of the century Such casts are now not only fascinating historical objects but may also be considered time capsules capturing the details of important ancient works when they were first moulded in centuries past This book examines the role of 19th century casts as an archaeological resource and explores how their materiality and spread impacted the reception of the Parthenon sculptures and other Greek and Roman works Investigation of their historical context is combined with analysis of new digital models of the Parthenon sculptures and their casts Sensitive 3D imaging techniques allow investigation of the surface markings of the objects in exceptionally fine detail and enable quantitative comparative studies comparing the originals and the casts The 19th century casts are found to be even more accurate but also complex than anticipated through careful study of their multiple layers we can retrieve surface information now lost from the originals through weathering and vandalism

*The Sculptures of the Parthenon* Margaretha Rossholm Lagerlöf, 2000-01-01 The book compares the sculptures of the pediments to those of the metopes and the frieze uncovering subtle differences in both the nature and the

content of their images Whereas the pediments represent divine elements for example the frieze is seen as the domain of human beings representing events and also the stage of history when humans no longer have direct access to the presence of the gods The frieze can be interpreted as an invocation of this presence a means of regaining closeness with the gods Using a multifaceted and imaginative approach to the sculptures of the Parthenon Lagerl f finds powerful new meaning in them as well as an enhanced appreciation of their Athenian creators
