Beyond Technocracy Massimiano Bucchi, 2009-06-02 Nuclear energy stem cell technology GMOs the more science advances the more society seems to resist But are we really watching a death struggle between opposing forces as so many would have it Can today's complex technical policy decisions coincide with the needs of a participatory democracy Are the two sides even equipped to talk to each other Beyond Technocracy Science Politics and Citizens answers these questions with clarity and vision Drawing upon a

broad range of data and events from the United States and Europe and noting the blurring of the expert lay divide in the knowledge base the book argues that these conflicts should not be dismissed as episodic or the outbursts of irrationality and ignorance but recognized as a critical opportunity to discuss the future in which we want to live Massimiano Bucchi's analysis covers the complex realities of post academic science as he Explores the widely debated theme of science and democracy across a broad range of technological controversies Overviews issues raised by the current relationship among scientists policymakers business interests and the public Dispels stereotypes of the detached scientific community versus the uninformed general public Examines the role of the media in framing scientific debate Addresses the question of how to move beyond technocracy to a more fruitful collaboration between scientists and citizens Offers a bold vision for a future in which the scientific and public spheres regard each other as partners working toward a shared purpose Beyond Technocracy Science Politics and Citizens has great value as a postgraduate text for courses in technology and society political science and science policy It will also find an interested audience among scientists policymakers managers in the technological sector and concerned lay readers *Science in Society* 59 Dr. Mae-Wan Ho, Prof. Peter Saunders, Dr. Eva

Science In Public Jane Gregory, Steven Miller, 2000-09-07 Does the general public need to understand science And if so is it scientists responsibility to communicate Critics have argued that despite the huge strides made in technology we live in a scientifically illiterate society one that thinks about the world and makes important decisions without taking scientific knowledge into account But is the solution to this illiteracy to deluge the layman with scientific information Or does science news need to be focused around specific issues and organized into stories that are meaningful and relevant to people s lives In this unprecedented comprehensive look at a new field Jane Gregory and Steve Miller point the way to a more effective public understanding of science in the years ahead

Science as an Open Enterprise The Royal Society / 1 London, Royal Society (Great Britain), Royal Society (Great Britain). Policy Studies Unit, 2012 The Science as an open enterprise report highlights the need to grapple with the huge deluge of data created by modern technologies in order to preserve the principle of openness and to exploit data in ways that have the potential to create a second open science revolution Exploring massive amounts of data using modern digital technologies has enormous potential for science and its application in public policy and business The report maps out the changes that are required by scientists their institutions and those that fund and support science if this potential is to be realised

Ensuring the Integrity, Accessibility, and Stewardship of Research Data in the Digital Age Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Committee on Ensuring the Utility and Integrity of Research Data in a Digital Age, 2009-11-17 As digital technologies are expanding the power and reach of research they are also raising complex issues These include complications in ensuring the validity of research data standards that do not keep pace with the high rate of innovation restrictions on data sharing that reduce the ability of researchers to verify results and build on previous research and huge increases in the amount of data being generated creating severe challenges in preserving that data for long term use

Ensuring the Integrity Accessibility and Stewardship of Research Data in the Digital Age examines the consequences of the changes affecting research data with respect to three issues integrity accessibility and stewardship and finds a need for a new approach to the design and the management of research projects The report recommends that all researchers receive appropriate training in the management of research data and calls on researchers to make all research data methods and other information underlying results publicly accessible in a timely manner The book also sees the stewardship of research data as a critical long term task for the research enterprise and its stakeholders Individual researchers research institutions

research sponsors professional societies and journals involved in scientific engineering and medical research will find this book an essential guide to the principles affecting research data in the digital age Convergence of Knowledge, Technology and Society Mihail C. Roco, William S. Bainbridge, Bruce Tonn, George Whitesides, 2014-01-28 This volume aims to document the most important worldwide accomplishments in converging knowledge and technology including converging platforms methods of convergence societal implications and governance in the last ten years Convergence in knowledge technology and society is the accelerating transformative interaction among seemingly distinct scientific disciplines technologies and communities to achieve mutual compatibility synergism and integration and through this process to create added value for societal benefit It is a movement that is recognized by scientists and thought leaders around the world as having the potential to provide far reaching solutions to many of today s complex knowledge technology and human development challenges Four essential and interdependent convergence platforms of human activity are defined in the first part of this report nanotechnology biotechnology information technology and cognitive science NBIC foundational tools Earth scale environmental systems human scale activities and convergence methods for societal scale activities The report then presents the main implications of convergence for human physical potential cognition and communication productivity and societal outcomes education and physical infrastructure sustainability and innovative and responsible governance As a whole the report presents a new model for convergence To effectively take advantage of this potential a proactive governance approach is suggested The study identifies an international opportunity to develop and apply convergence for technological economic environmental and societal benefits The panel also suggests an opportunity in the United States for implementing a program aimed at focusing disparate R and D energies into a coherent activity a Societal Convergence Initiative This study received input from leading academic industry government and NGO experts from the United States Latin America Europe Asia and Australia Symbiotic Futures: Navigating the Intersections of Science, Technology, and Society Thomas C. Bunton, 2024-10-24 Symbiotic Futures Navigating the Intersections of Science Technology and Society invites readers to embark on a captivating journey through the complex relationship between science technology and society Delving into a wide range of topics this book offers a comprehensive exploration of the ethical political cultural educational health related environmental and global dimensions of scientific advancements Starting with an Introduction to Science and Society readers gain a solid foundation in understanding the intricate connections between these three domains The book then takes a historical perspective tracing the evolution of science and society and highlighting the pivotal role of science in shaping historical events The chapters go beyond historical contexts examining how scientific discoveries are influenced by social and cultural factors as well as the societal impact of paradigm shifts within science Ethics and scientific decision making take center stage in the chapter on Science and Ethics Readers are prompted to reflect on the ethical dilemmas inherent in scientific research and explore the connection between science ethics and public policy The book further explores the

intersection of science and politics delving into the role of science in policy making processes and the political influences that shape scientific research and funding Understanding the influence of science on cultural values beliefs and practices is the focus of the chapter on Science and Culture Delving into the cultural dimensions of scientific controversies this chapter sheds light on cultural perceptions of scientific knowledge and progress The importance of effective science communication to the public is emphasized in the subsequent chapter discussing strategies challenges and ethical considerations in science communication and public engagement Education and health related aspects are covered in two separate chapters Science and Education explores the role of science education in society promoting scientific literacy critical thinking skills and innovations in science education technology Science and Health delve into the impacts of scientific advancements on healthcare addressing ethical considerations in medical research and practice and the role of scientific evidence in influencing public health policies The book also examines the environmental consequences of scientific and technological activities in the chapter on Science and the Environment Readers gain insights into sustainable development the role of science in addressing climate change and biodiversity loss and the ethical issues surrounding environmental science and policy making Lastly Science and Global Challenges bring attention to science s role in addressing global challenges explores the societal implications of emerging technologies ethical dilemmas in science and technology on a global scale and the promotion of responsible science and technology for a sustainable future With its in depth exploration of varied topics Symbiotic Futures Navigating the Intersections of Science Technology and Society serves as a valuable resource for individuals passionate about understanding the interplay of science technology and society in shaping our present and future Whether you are an academic seeking a comprehensive overview or a curious reader keen on exploring the societal implications of scientific advancements this book offers a thought provoking and enlightening experience

Deitrich,1992 Toward Equitable Science Communication in an Algorithmically Infused Society Shiyu Yang,2023 In an era of increasingly fast moving and disruptive scientific and technological advances communicating science to broad segments of the population becomes more important than ever The persistent challenge to reach diverse population segments especially those that are traditionally underserved by science outreach efforts is complicated by the fast evolving information environment we live in Many of today s media platforms are driven by artificial intelligence AI algorithms which tailor information to our personal preferences biases and contexts Despite the deepening integration of these algorithmically driven media tools such as social media platforms and online news aggregators into our everyday life it remains unclear how these media tools distribute scientific information in society across diverse population segments It is also unclear how such media infrastructures might shape important individual and collective outcomes such as knowledge of emerging science and technologies Moreover research and practice should continue to develop communication strategies for addressing information inequity in contemporary media environments This dissertation investigates how the media and their message level factors might affect diverse social segments knowledge of three wicked science issues namely human gene editing artificial intelligence and COVID 19 and its related vaccines in today s algorithmically infused information environment It begins by reviewing the current algorithmically infused information environment explain disparities in science knowledge and how the new

information environment shapes them and comparing the three wicked science issues that make up the contexts of inquiry This dissertation then uses a sock puppet algorithm audit design to explore the extent to which algorithmically driven social media platforms such as YouTube recommend science content based on users racial and socioeconomic status SES profiles Study A From there this dissertation uses three public opinion survey datasets to examine whether use of different social media platforms affects the gaps in factual and perceived knowledge of wicked science issues among Americans with different racial and SES makeup Study B Finally using an experiment this dissertation examines how message characteristics such as information modality visual versus text based and rhetorical mode narrative versus logical scientific could be leveraged against inequalities in understanding of and engagement with health science information among individuals with varying levels of science literacy Study C Results show that social media algorithms such as the YouTube algorithm can indeed expose sociodemographically diverse audiences to different subsets of information even when people are actively searching for the same science issues although the degree of information tailoring may depend on the specific search topic e g how heavily the issue is discussed by different sources on YouTube Higher SES audiences especially higher SES White American audiences are likely to receive a wider range of video and channel recommendations when searching for science issues than lower SES audiences In addition use of different social media platforms is overall associated with wider gaps in factual knowledge of the three science issues and narrower gaps in perceived knowledge of the three wicked science issues among racial minorities than among Whites Finally exposure to visual or narrative messages about COVID 19 vaccine safety significantly reduces the gap in factual knowledge of COVID 19 vaccine safety between high and low science literacy groups while exposure to narrative but not visual messages also reduces the gap in message elaboration between the groups However combining visuals and narratives does not further enhance message effectiveness The theoretical methodological and practical implications of this dissertation are discussed

Bridging Worlds: Communicating Science in a Complex Society Bridgette O. Robles, 2024-10-24 Bridging Worlds Communicating Science in a Complex Society is an essential guide for anyone interested in effectively communicating science in today s complex society With a focus on science communication principles this book provides readers with valuable insights into understanding audience needs crafting clear and engaging messages and utilizing visuals and multimedia to enhance communication The book delves into the history and evolution of science communication highlighting the vital role of science communicators in bridging the gap between scientific knowledge and the general public It explores the art of storytelling in science communication emphasizing the importance of writing for different mediums and audiences Readers will learn how to create compelling visuals through infographics data visualization photography and videography In the digital age the book emphasizes the significance of utilizing social media platforms managing science communication websites and embracing podcasting and video blogging It also sheds light on the role of journalists in responsible reporting of scientific findings and navigating science controversies in the media Educating and
