tradition and a specifically Scythian contribution to the working of precious metals related to but ultimately distinguishable from the goldworking traditions of Achaemenid Iran late Classical Greece and the larger Hellenistic world This volume offers substantial bibliography relating to the extensive research on Scythian art archaeology and history published in the Russian and Ukrainian languages over the last 150 years *Buddhism in Afghanistan and Central Asia* Simone Gaulier,Robert Jera-Bezard,Monique Maillard,2023-09-29 Scholarly monographs on the iconography of Indian religions including Buddhism Jainism Sikhism in India and neighbouring geographical regions *Diversity in Visual Representations of the Past* Jo Zalea Matias,Nicola Scheyhing,Doris Gutsmedl-Schümann,2025-09-26 This volume presents an overview of the diversity or lack thereof in visual representations of the European past that are found in archaeology museums and media While publications discussing gender stereotypes in European archaeological media exist other identities remain underrepresented namely Black Indigenous and People of Color BIPOC those with visible and invisible disabilities and very young and very old This volume offers insight into these gaps in European media and archaeology while also providing alternative explanations for interpreting these often stereotyped identities and methodologies for inclusion The chapters within this volume are divided into four themes Themes cover the development of images of the past and discusses how images are chosen in museums The book identifies who is missing in images of the past with topics on representing individuals with disabilities children in museums the Other in Roman art and Scythians in museums and books and critiques approaches to representation and diversity in media such as in textbooks popular media and children s books Finally the book challenges the lack of diversity and a proliferation of stereotypes in images of the past and asks how do we improve on them and create new ones Overall this book addresses the need for diversity in images both within academic archaeology and with the broader public **The Scythians** Barry Cunliffe,2019-09-26 Brilliant horsemen and great fighters the Scythians were nomadic horsemen who ranged wide across the grasslands of the Asian steppe from the Altai mountains in the east to the Great Hungarian Plain in the first millennium BC Their steppe homeland bordered on a number of sedentary states to the south the Chinese the Persians and the Greeks and there were inevitably numerous interactions between the nomads and their neighbours The Scythians fought the Persians on a number of occasions in one battle killing their king and on another occasion driving the invading army of Darius the Great from the steppe Relations with the Greeks around the shores of the Black Sea were rather different both communities benefiting from trading with each other This led to the development of a brilliant art style often depicting scenes from Scythian mythology and everyday life It is from the writings of Greeks like the historian Herodotus that we learn of Scythian life their beliefs their burial practices their love of fighting and their ambivalent attitudes to gender It is a world that is also brilliantly illuminated by the rich material culture recovered from Scythian burials from the graves of kings on the Pontic steppe with their elaborate gold work and vividly coloured fabrics to the frozen tombs of the Altai mountains where all the organic material wooden carvings carpets saddles and even tattooed human bodies is amazingly well

preserved Barry Cunliffe here marshals this vast array of evidence both archaeological and textual in a masterful reconstruction of the lost world of the Scythians allowing them to emerge in all their considerable vigour and splendour for the first time in over two millennia Early Buddhist Narrative Art Patricia E. Karetzky, 2000-04-26 Early Buddhist

Iron Age nomadic alliances flourished along the 5000 mile Eurasian steppe route From Crimea to the Mongolian grassland nomadic image making was rooted in metonymically conveyed zoomorphic designs creating an alternative ecological reality The nomadic elite nucleus embraced this elaborate image system to construct collective memory in reluctant diverse political alliances organised around shared geopolitical goals rather than ethnic ties Largely known by the term e animal stylee this zoomorphic visual rhetoric became so ubiquitous across the Eurasian steppe network that it transcended border regions and reached the heartland of sedentary empires like China and Persia This book shows how a shared fluency in animal style design became a status defining symbol and a bonding agent in opportunistic nomadic alliances and was later adopted by their sedentary neighbours to showcase worldliness and control over the e Other In this study of enormous geographical scope the author raises broader questions about the place of nomadic societies in the art historical canon **Masters of the Steppe: The Impact of the Scythians and Later Nomad Societies of Eurasia** Svetlana Pankova, St John
