Coastal Karst Landforms Michael J. Lace, John E. Mylroie, 2013-06-28 Carbonate rock coasts are found world wide from continental shorelines of the Adriatic Sea of Europe to the Yucatan Peninsula of North America and on tropical islands from Rodrigues Island in the Indian Ocean to the Mariana Islands in the Pacific Ocean to the Bahama Islands in the Atlantic Ocean Such coasts are well known for their unusual and distinctive karst landforms Karst processes particularly those associated with coastal landforms are proving to be surprisingly unique and complex This volume presents a comprehensive overview of the processes associated with coastal karst development comparing examples from a broad geographical and geomorphological range of island and continental shoreline paleoshoreline settings including a review of pseudokarst processes that can compete with and overprint dynamic coastal karst landscapes As effective management of hydrologic resources grows more complex coastal caves and karst represent fundamental components in associated coastal aquifers which in the rock record can also form significant petroleum reservoirs Audience By providing a clearer understanding of the geological biological archaeological and cultural value of coastal caves and karst resources this volume offers a critical tool to coastal researchers and geoscientists in related fields and to coastal land managers as it illustrates the diversity of coastal karst landforms the unique processes which formed them the diversity of resources they harbor and their relationship to coastal zone preservation strategies and the development of sustainable management approaches **Landscapes and**

Landforms of the Maltese Islands Ritienne Gauci, John A. Schembri, 2019-08-04 This edited volume brings together a collection of works that comprehensively address both the myriad geomorphological landscapes of the Maltese Islands and how their evolution has been shaped over various time scales by different sets of processes Additionally the work highlights how the small geographical setting of the Maltese Islands helped to closely connect these landscapes with Maltese society and as a result they have evolved from stand alone examples of geomorphology to important backdrops of Maltese cultural identity Most of the contributing authors are academics both local and foreign with a research focus on the geomorphology of the Maltese Islands However the editors have also and purposefully chosen other contributors from governmental institutions and research agencies who complement the geomorphological research with their proactive work in selected case studies on Maltese landscapes Underground Rivers Richard J. Heggen, 2021-01-01 Underground rivers in science history the arts and any number of sightings elsewhere

The Archaeology of Caves in Ireland Marion Dowd, 2015-01-31 The Archaeology of Caves in Ireland is a ground breaking and unique study of the enigmatic unseen and dark silent world of caves People have engaged with caves for the duration of human occupation of the island spanning 10 000 years In prehistory subterranean landscapes were associated with the dead and the spirit world with evidence for burials funerary rituals and votive deposition The advent of Christianity saw the adaptation of caves as homes and places of storage yet they

also continued to feature in religious practice Medieval mythology and modern folklore indicate that caves were considered places of the supernatural being particularly associated with otherworldly women Through a combination of archaeology mythology and popular religion this book takes the reader on a fascinating journey that sheds new light on a hitherto neglected area of research It encourages us to consider what underground activities might reveal about the lives lived aboveground and leaves us in no doubt as to the cultural significance of caves in the past [Lonely Planet Tasmania](#) Lonely Planet, *Ultimate Visual Dictionary* DK,2017-01-17 Discover the definitions you need with this small dictionary that uses pictures diagrams and detailed annotations Ultimate Visual Dictionary has been designed to give you easy access to the vocabulary you need It contains more than 33 000 terms that are grouped into 14 sections that cover a wide range of topics such as The Universe Prehistoric Earth Modern World and Architecture The accessible and paperback format makes this dictionary an ideal reference tool for new learners of the English language or anyone who wants to know more about a particular topic See what other dictionaries only tell you with the Ultimate Visual Dictionary **Australian Caves and Karst Systems** John Webb,Susan White,Garry K.
