The Seagoing Computer Randall Brink, 1994 *When Computers Went to Sea* David L. Boslaugh, 2003-04-16 *When Computers Went to Sea* explores the history of the United States Navy's secret development of code breaking computers and their adaptation to solve a critical fleet radar data handling problem in the Navy's first seaborne digital computer system that went to sea in 1962 This is the only book written on the United States Navy's initial application of shipboard digital computers to naval warfare Considered one of the most successful projects ever undertaken by the US Navy the Naval Tactical Data System NTDS was the subject of numerous studies attempting to pinpoint the reason for the system's inordinate success in the face of seemingly impossible technical challenges and stiff resistance from some in the military The system's success precipitated a digital revolution in naval warfare systems Dave Boslaugh details the innovations developed by the NTDS project managers including project management techniques modular digital hardware for ship systems top down modular computer programming techniques innovative computer program documentation and other novel real time computer system concepts Automated military systems users and developers real time process control systems designers automated system project managers and digital technology history students will find this account of a United States military organization's initial foray into computerization interesting and thought provoking *Encyclopedia of Computer Science and Technology* Allen Kent, James G. Williams, 2021-06-23 This comprehensive reference work provides immediate fingertip access to state of the art technology in nearly 700 self contained articles written by over 900 international authorities Each article in the Encyclopedia features current developments and trends in computers software vendors and applications extensive bibliographies of leading figures in the field such as Samuel Alexander John von Neumann and Norbert Wiener and in depth analysis of future directions Computer Applications in the Earth Sciences Daniel Merriam, 2013-03-08 It has been evident for several years that a summary of where we came from where we are and where we are going with computer oriented research was not only desirable but necessary The application of computers by earth scientists is numerous and the methods have proved of value in problem solving as well as data processing Many methods unknown or unavailable just a few years ago now are used routinely An overall appraisal of the methods at this time is deemed more than appropriate Preface to the program was stated as Computer applications in the earth sciences is the subject of this International Symposium held on campus at The University of Kansas at Lawrence on 16 17 and 18 June 1969 The symposium the sixth in a series is sponsored by the Kansas Geological Survey International Association for Mathematical Geology and University Extension Papers by leading experts in their field stress the status of the art Speakers will discuss the use of computers in the earth sciences past present and future The meeting is planned for those not acquainted with the tremendous advancements made in quantitative methods in recent years and those who are interested in future possibilities
