Kirwin,G. M. Story,J.D.A.

Widdowson,1990-11-01 The Dictionary of Newfoundland English first published in 1982 to regional national and international acclaim is a historical dictionary that gives the pronunciations and definitions for words that the editors have called Newfoundland English The varieties of English spoken in Newfoundland date back four centuries mainly to the early seventeenth century migratory English fishermen of Cornwall Devon Dorset and Somerset and to the seventeenth to the nineteenth century immigrants chiefly from southeastern Ireland Culled from a vast reading of books newspapers and magazines this book is the most sustained reading ever undertaken of the written words of this province The dictionary gives not only the meaning of words but also presents each word with its variant spellings Moreover each definition is succeeded by an all important quotation of usage which illustrates the typical context in which word is used This well researched impressive work of scholarship illustrates how words and phrases have evolved and are used in everyday speech and writing in a specific geographical area The Dictionary of Newfoundland English is one of the most important comprehensive and thorough works dealing with Newfoundland Its publication a great addition to Newfoundlandia Canadiana and lexicography provides more than a regional lexicon In fact this entertaining and delightful book presents a panoramic view of the social cultural and natural history as well as the geography and economics of the quintessential lifestyle of one of Canada s oldest European settled areas This second edition contains a supplement offering approximately 1500 new or expanded entries an increase of more than 30 per cent over the first edition Besides new words the supplement includes modified and additional senses of old words and fresh derivations and usages

*The Shadows of Consumption* Peter Dauvergne,2010-09-24 An environmentalist maps the hidden costs of overconsumption in a globalized world by tracing the environmental consequences of five commodities The Shadows of Consumption gives a hard hitting diagnosis many of the earth s ecosystems and billions of its people are at risk from the consequences of rising consumption Products ranging from cars to hamburgers offer conveniences and pleasures but as Peter Dauvergne makes clear global political and economic processes displace the real costs of consumer goods into distant ecosystems communities and timelines tipping into crisis people and places without the power to resist In The Shadows of Consumption Peter Dauvergne maps the costs of consumption that remain hidden in the shadows cast by globalized corporations trade and finance Dauvergne traces the environmental consequences of five commodities automobiles gasoline refrigerators beef and harp seals In these fascinating histories we learn for example that American officials ignored warnings about the dangers of lead in gasoline in the 1920s why China is now a leading producer of CFC free refrigerators and how activists were able to stop Canada s commercial seal hunt in the 1980s but are unable to do so now Dauvergne s innovative analysis allows us to see why so many efforts to manage the global environment are failing even as environmentalism is slowly strengthening He proposes a guiding principle of balanced consumption for both consumers and corporations We know that we can make things better by driving a high mileage car eating locally grown food and buying energy efficient appliances but these improvements are incremental local and insufficient More crucial than our

individual efforts to reuse and recycle will be reforms in the global political economy to reduce the inequalities of consumption and correct the imbalance between growing economies and environmental sustainability      **Proceedings of the House of Assembly and Legislative Council** Newfoundland.
