Scientific Report on The Search for Bridey Murphy Milton V. Kline,1956 **The Search for Bridey Murphy** Sarah Cotter Hogroian,Columbia University. Theatre Arts Division,1997 How the Case of The Search for Bridey Murphy Stands Today Curt John Ducasse,American Society for Psychical Research,1960 **The Search for Bridey Murphy** Morris Bernstein, First published in 1956 this classic is still fresh for today s New Age audiences Relates an American businessman s investigation into the phenomenal experiences of a young woman who under hypnosis recalls the events of an earlier existence in nineteenth century Ireland Twenty Cases Suggestive of Reincarnation Ian Stevenson,1980 Cases of responsive xenoglossy thus add to the evidence concerning the survival of human personality after death **Bridey Murphy--fact, Fraud, Or Fancy?** ,1956 **The Parapsychology Revolution** Robert M. Schoch,Logan Yonavjak,2008-01-31 Grounded in both scientific acumen and constructive inquiry this anthology shines a rare clarifying light on the controversial realms of psychical and paranormal research surveying reports essays and arguments from more than a century of investigation into matters such as clairvoyance telepathy and past life regression In the past one hundred and twenty five years despite a relative paucity of funding and the troubling persistence of fraud serious inquiry into the paranormal particularly as it relates to clairvoyance and psychical perception has successfully entered the scientific age Studies in the modern laboratory employing rigorous methodology and peer reviewed oversight have conclusively detected statistical anomalies that suggest the presence of some not yet understood faculty of the human mind In *The Parapsychology Revolution* Robert M Schoch Ph D a scholar widely known for his geological theories that question the conventional dating of the Great Sphinx and researcher Logan Yonavjak introduce and anthologize core writings that underscore the range and continuing challenges of psychical research The book s extensive introduction and the editors commentary on individual essays and sections highlight milestones feuds and key players that mark the nascent history of this fascinating and important field of research Finally *The Parapsychology Revolution* addresses and clarifies the all important question Is there legitimate evidence for a world beyond the ordinary Bottoming Out the Universe Richard Grossinger,2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself

How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth s own words and Jane Roberts s and John Friedlander s interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency

Park,2008-09-22 Why the battle between superstition and science is far from over From uttering a prayer before boarding a plane to exploring past lives through hypnosis has superstition become pervasive in contemporary culture Robert Park the best selling author of Voodoo Science argues that it has In Superstition Park asks why people persist in superstitious convictions long after science has shown them to be ill founded He takes on supernatural beliefs from religion and the afterlife to New Age spiritualism and faith based medical claims He examines recent controversies and concludes that science is the only way we have of understanding the world Park sides with the forces of reason in a world of continuing and he fears increasing superstition Chapter by chapter he explains how people too easily mistake pseudoscience for science He discusses parapsychology homeopathy and acupuncture he questions the existence of souls the foundations of intelligent design and the power of prayer he asks for evidence of reincarnation and astral projections and he challenges the idea of heaven Throughout he demonstrates how people s blind faith and their confidence in suspect phenomena and remedies are manipulated for political ends Park shows that science prevails when people stop fooling themselves Compelling and precise Superstition takes no hostages in its quest to provoke In shedding light on some very sensitive and Park would say scientifically dubious issues the book is sure to spark discussion and controversy **Reincarnation** Paul
