Inner Experiences: Theory, Measurement, Frequency, Content, and Functions Alain Morin, Thomas M.

Brinthaup, Jason D. Runyan, 2016-02-26 One fundamental topic of scientific inquiry in psychology is the study of what William James called the stream of consciousness our ongoing experience of the world and ourselves from within our inner experiences These internal states aka stimulus independent thoughts include inner speech mental imagery feelings sensory awareness internally produced sounds or music unsymbolized thinking and mentalizing thinking about others mental states They may occur automatically during mind wandering daydreaming and resting state episodes and may focus on one s past present or future mental time travel e g autoautonoetic consciousness Inner experiences also may take the form of intrusive or ruminative thoughts The types characteristics frequency content and functions of inner experiences have been studied using a variety of traditional methods among which questionnaires thought listing procedures i e open ended self reports thinking aloud techniques and daily dairies Another approach articulatory suppression consists in blocking participants use of verbal thinking while completing a given task deficits indicate that inner speech plays a causal role in normal task completion Various thought sampling approaches have also been developed in an effort to gather more ecologically valid data Previous thought sampling studies have relied on beepers that signal participants to report aspects of their inner experiences at random intervals More recent studies are exploiting smartphone technology to easily and reliably probe randomly occurring inner experiences in large samples of participants These various measures have allowed researchers to learn some fundamental facts about inner experiences To illustrate it is becoming increasingly clear that prospection future oriented thinking greatly depends on access to autobiographical memory past oriented thinking where recollection of past scenes is used as a template to formulate plausible future scenarios The main goal of the present Research Topic was to offer a scientific platform for the dissemination of current high quality research pertaining to inner experiences Although data on all forms of inner experiences were welcome reports on recent advances in inner speech research were particularly encouraged Here are some examples of topics of interest 1 description and validation of new scales inventories questionnaires measuring any form of inner experience 2 novel uses or improvements of existing measures of inner experiences 3 development of new smartphone technology facilitating or broadening the use of cell phones to sample inner experiences 4 frequency content and functions of various inner experience 5 correlations between personality or cognitive variables and any aspects of inner experiences 6 philosophical or theoretical considerations pertaining to inner experiences and 7 inner experience changes with age

The Psychology Of Religion Bernard Spilka, 2019-05-20 Theory in the psychology of religion is in a state of rapid development and the present volume demonstrates how various positions in this field may be translated into original foundational work that will in turn encourage exploration in many directions A number of new contributions are collected with previously published pieces to illustrate the

The "Other" Psychology of Julian Jaynes Brian J. McVeigh, 2018-01-17 In his provocative but critically acclaimed theory about the origin of introspectable mentality Julian Jaynes argued that until the late second millennium people possessed a different psychology a two chambered bicameral neurocultural arrangement in which a commanding god guided admonished and ordered about a listening mortal via voices visions and visitations Out of the cauldron of civilizational

collapse and chaos an adaptive self reflexive consciousness emerged better suited to the pressures of larger more complex sociopolitical systems Though often described as boldly iconoclastic and far ahead of it time Jaynes s thinking actually resonates with a second or other psychological tradition that explores the cultural historical evolution of psyche Brian J McVeigh a student of Jaynes points out the blind spots of mainstream establishment psychology by providing empirical support for Jaynes s ideas on sociohistorical shifts in cognition He argues that from around 3500 to 1000 BCE the archaeological and historical record reveals features of hallucinatory super religiosity in every known civilization As social pressures eroded the god centered authority of bicamerality an upgraded psychology of interiorized self awareness arose during the Late Bronze Age Collapse A key explanatory component of Jaynes s theorizing was how metaphors constructed a mental landscape populated with I s and me s that replaced a declining worldview dominated by gods ancestors and spirits McVeigh statistically substantiates how linguo conceptual changes reflected psychohistorical developments because supernatural entities functioned in place of our inner selves vocabularies for psychological terms were strikingly limited in ancient languages McVeigh also demonstrates the surprising ubiquity of hearing voices in modern times contending that hallucinations are bicameral vestiges and that mental imagery a controllable semi hallucinatory experience is the successor to the divine hallucinations that once held societies together This thought provoking work will appeal to anyone interested in the transformative power of metaphors the development of mental lexicons and the adaptive role of hallucinations *Gerda Walther's Phenomenology of Sociality, Psychology, and Religion* Antonio Calcagno, 2018-10-24 This book explores the philosophical writings of Gerda Walther 1897 1977 It features essays that recover large parts of Walther s oeuvre in order to show her contribution to phenomenology and philosophy In addition the volume contains an English translation of part of her major work on mysticism The essays consider the interdisciplinary implications of Gerda Walther s ideas A student of Edmund Husserl Edith Stein and Alexander Pf nder she wrote foundational studies on the ego community mysticism and religion and consciousness Her discussions of empathy identification the ego and ego consciousness alterity God mysticism sensation intentionality sociality politics and woman are relevant not only to phenomenology and philosophy but also to scholars of religion women s and gender studies sociology political science and psychology Gerda Walther was one of the important figures of the early phenomenological movement However as a woman she could not habilitate at a German university and was therefore denied a position Her complete works have yet to be published This ground breaking volume not only helps readers discover a vital voice but it also demonstrates the significant contributions of women to early phenomenological thinking **The Feminine in Jungian Psychology and in Christian Theology** Ann Belford Ulanov, 1971 The Feminine in Jungian Psychology and in Christian Theology investigates the implications for Christian theology of Jung s special insights into the feminine In it Ann Belford Ulanov gathers together in one volume what Jung and Jungians have discovered about the feminine in order to explore what Jungian thought and methods may illuminate about the

place of the feminine in Christian theology Jung focuses on the human person and sees as central its mixture of masculine and feminine elements In a time when so much is asserted and written about women in society their rights roles identities needs and contributions it is especially significant that Jung asserts the existence of the feminine as a key element not only in women but in men as well No less contested are the roles and identities of Christians Ulanov brings into focus the deep and fascinating connections between theology and psychology

Reflections on Self Psychology (Psychology Revivals) Joseph Lichtenberg, Samuel Kaplan, 2014-01-27

Originally published in 1983 *Reflections on Self Psychology* records the development of a powerful initiative to alter psychoanalytic theory and practice and an evaluative questioning of this initiative. It presents a dialogue that developed at the Boston Symposium of 1980 between vigorous proponents of self psychology, equally energetic critics and many participants between these polar positions. This book attempts to capture within its pages not only the content of what was presented, explored and evaluated in Boston but also a sense of the people about 1 000 strong who exchanged their ideas on and off the podium and the remarkable spirit of open inquiry that invigorated these proceedings. The book as was the meeting is organized to explore four subjects: the development of the self, infant research, the implications of self psychology for psychoanalytic practice, self psychology and psychotherapy and the implications of self psychology for psychoanalytic theory. The final section of the book is devoted to an essay by Heinz Kohut that provides an integrated response to the issues and criticisms raised in the course of the symposium. This essay while based on extemporaneous responses by Kohut during different phases of the meeting is in its written version a cohesive, carefully revised and edited statement prepared in the mellowing period following the meeting and before Kohut's untimely death. *A History of Psychology* George Sidney

Brett, 1912 **Empathy II (Psychology Revivals)** Joseph Lichtenberg, Melvin Bornstein, Donald Silver, 2014-01-27 When the late Heinz Kohut defined psychoanalysis as the science of empathy and introspection, he sparked a debate that has animated psychoanalytic discourse ever since. What is the relationship of empathy to psychoanalysis? Is it a constituent of analytical technique, an integral aspect of the therapeutic action of analysis, or simply a metaphor for a mode of observation better understood via classical theory and terminology? The dialogue about empathy, which is really a dialogue about the nature of the analytic process, continues in this two-volume set originally published in 1984. In Volume I, several illuminating attempts to define empathy are followed by Kohut's essay *Introspection, Empathy and the Semicircle of Mental Health*. Kohut's paper in turn ushers in a series of original contributions on *Empathy as a Perspective in Psychoanalysis*. The volume ends with five papers which strive to demarcate an empathic approach to various areas of artistic endeavour, including the appreciation of visual art. Volume II continues the dialogue with a series of developmental studies which explore the role of empathy in early child care at the same time as they chart the emergence of the young child's capacity to empathize. In the concluding section *Empathy in Psychoanalytic Work*, contributors and discussants return to the arena of technique. They not only theorize about empathy in relation to analytic understanding and communication but address issues of nosology, considering how the empathic vantage point may be utilized in the treatment of patients with borderline and schizophrenic pathology. In their critical attention to the many dimensions of empathy—philosophical, developmental, therapeutic, artistic—the contributors collectively bear witness to the fact that Kohut has helped to shape new questions but not set limits to the search for answers. The product of their efforts is an anatomical exploration of a topic whose relevance for psychoanalysis and psychotherapy is only beginning to be understood. **A Text-book in Psychology** Johann Friedrich Herbart, 1891

Tourist Experience and Fulfilment Sebastian Filep, Philip Pearce, 2013-07-31 What makes life worth living Many people would argue that it is fulfilling experiences These experiences are characterised by feelings of joy and pleasure positive relationships and a sense of engagement meaning and achievement Tourism is arguably one of the largest self initiated commercial interventions to promote well being and happiness on the global scale but yet there is absence in the literature on the topic of fulfilling tourist experiences from psychological perspectives Drawing on insights and theories from the research field of positive psychology the study of well being this is the first edited book to evaluate tourist experiences from positive psychology perspectives The volume addresses the important topic of fulfilment through the lens of the world s largest social global phenomenon tourism In doing so the book refreshes and challenges some aspects of tourist behaviour research The chapters are grouped under three broad sections which reflect a range of positive psychological outcomes that personal holiday experiences can produce namely happiness and humour meaning and self actualisation and health and restoration The book critically explores these fulfilling experiences from interdisciplinary perspectives and includes research studies from wide range of geographical regions By analysing the contemporary fulfilling tourist experiences the book will provide further understanding of tourist behaviour and experience Written by leading academics this significant volume will appeal to those interested in Tourism and Positive Psychology

Psychology in Theory and Application Horatio Willis Dresser, 1924 **Discovering Cultural Psychology** Walter J. Lonner, Susanna A.

Hayes, 2007-06-01 This book is a landmark in contemporary cultural psychology Ernest Boesch s synthesis of ideas is the first comprehensive theory of culture in psychology since Wilhelm Wundt s *Völkerpsychologie* of the first decades of the twentieth century Cultural psychology of today is an attempt to advance the program of research that was charted out by Wundt yet at times we are carefully avoiding direct recognition of such continuity While Wundt s experimental psychology has been hailed as the root for contemporary scientific psychology the other side of his contribution ethnographic analysis of folk traditions and higher psychological functions has been largely discredited as something disconnected from the scientific realm As an example of soft science lacking the hardness of experimentation it has been considered to be an esoteric hobby of the

founding father of contemporary psychology Of course that focus is profoundly wrong the opposition soft versus hard just does not fit as a metalevel organizer of any science Yet the rhetoric discounting the descriptive side of Wundt's psychology is merely an act of social guidance of what psychologists do not a way of creating knowledge
