Modelling of Autonomous Search and Rescue Missions by Interval-Valued Neutrosophic WASPAS Framework Rokas Semenas, Romualdas Bausys, The application of autonomous robots in search and rescue missions represents a complex task which requires a robot to make robust decisions in unknown and dangerous environments However imprecise robot movements and small measurement errors obtained by robot sensors can have an impact on the autonomous environment exploration quality and therefore should be addressed while designing search and rescue SAR robots HCI Outdoors: Theory, Design, Methods and Applications D. Scott McCrickard, Michael Jones, Timothy L. Stelter, 2020-10-19 Advances in network connectivity power consumption and physical size create new possibilities for using interactive computing outdoors However moving computing outdoors can drastically change the human outdoor experience This impact is felt in many kinds of outdoor activities such as citizen science personal recreation search and rescue informal education and others It is also felt across outdoor settings that range from remote wilderness to crowded cities Understanding these effects can lead to ideas designs and systems that improve rather than diminish outdoor experiences This book represents the current results emerging from recent workshops focused on HCI outdoors and held in conjunction with CHI GROUP UbiComp and MobileHCI conferences Based on feedback at those workshops and outreach to other leaders in the field the chapters collected were crafted to highlight methods and approaches for understanding how technologies such as handhelds wearables and installed standalone devices impact individuals groups and even communities These findings frame new ways of thinking about HCI outdoors explore logistical issues associated with moving computing outdoors and probe new experiences created by involving computing in outdoor pursuits Also important are the ways that social media has influenced preparation experience and reflection related to outdoor experiences HCI Outdoors Theory Design Methods and Applications is of interest to HCI researchers HCI practitioners and outdoor enthusiasts who want to shape future understanding and current practice related to technology in every kind of outdoor experience *Structures and Architecture. A Viable Urban Perspective?* Marie Frier Hvejsel, Paulo J.S. Cruz, 2022-07-07 Structures and Architecture A Viable Urban Perspective contains extended abstracts of the research papers and prototype submissions presented at the Fifth International Conference on Structures and Architecture ICSA2022 Aalborg Denmark 6-8 July 2022 The book 578 pages also includes a USB with the full texts of the papers 1448 pages The contributions on creative and scientific aspects in the conception and construction of structures as architecture and on the role of advanced digital industrial and craft based technologies in this matter represent a critical blend of scientific technical and practical novelties in both fields Hence as part of the proceedings series Structures and Architecture the volume adds to a continuous exploration and development of the synergetic potentials of the fields of Structures and Architecture With each volume further challenging the conditions problems and potentials related to the art practice and theory of teaching researching designing and building structures as vehicles towards a viable
