

"The book is important and exciting because it provides rich material to test theories in social science and psychology. . . . Without ideologistic lenses Dr. Field has undoubtedly made a major contribution to the problem of culture and personality."

**Search for Security** Margaret Joyce Field,1960      *Search for Security* Margaret J. Field,1962      *Search for Security* Margaret Joyce Field (psychiatre),1960      **Colonial Psychiatry and the African Mind** Jock McCulloch,1995-01-12 In this first history of psychiatry in colonial Africa Jock McCulloch describes the clinical approaches of well known European practitioners including Frantz Fanon and Wulf Sachs They operated independently of one another Yet despite their differences they shared a coherent set of ideas about the African Mind based on the colonial notion of African inferiority By exploring the association between settler ideology and psychiatric research this study examines colonial science as a system of knowledge and power      **Psychology and Race** Peter Watson, Since the problems of race relations are worldwide the international origins and perspectives of this excellent and timely book are especially advantageous More research has been done in the United States than elsewhere on the psychology of race relations so it is appropriate that a plurality of the chapters of this book are by American authors a stellar group that includes leading contributors to our contemporary knowledge of the topic Contributors from the English speaking Commonwealth countries are next in number followed by authors from the United Kingdom where race related issues have only recently become a salient concern of politics and social ethics The editor has assigned topics to his carefully chosen author experts not by country or region but by matching the expertise of each author against a need for coherent analysis of the important aspects of psychology and race Psychology and Race is divided into two major parts The first half of the book looks at the interracial situation itself The first section concentrates on the majority or dominant group and describes the development and measurement of racial awareness and prejudice and techniques for reducing prejudice the second section focuses on the reactions of subordinate or minority groups and the third deals with specific aspects of interpersonal interaction attitudes behavior and performance when the people concerned are of different races The book also looks at those areas of life where race is relevant and where psychology can help in an understanding of the situation The scope of this volume the distinction of its authors and the hardheaded sense of reality it brings to the discussion of these extremely complex issues will make it an invaluable resource not only for teachers and students but also for everyone concerned in any way with this most pressing issue of our times Peter Watson was deputy editor of The New Society and spent a total of four years with The London Sunday Times as part of their Insight Team He has written several books and since 1998 has been Research Associate at the Illicit Antiquities Research Centre located at the McDonald Institute for Archaeological Research at the University of Cambridge United Kingdom      **Afterlife of Empire** Jordanna Bailkin,2012-11-15 This book investigates how decolonization transformed British society in the 1950s and 1960s and examines the relationship between the postwar and the postimperial      **Sharing the Burden of Sickness** Jonathan Roberts,2021-11-09 In Sharing the Burden of Sickness Jonathan Roberts examines the history of the healing cultures in Accra Ghana When people are sick in Accra they can pursue a variety of therapeutic options

West African traditional healers spiritual healers from the Islamic and Christian traditions Western clinical medicine and an open marketplace of over the counter medicine provide ample means to promote healing and preventing sickness Each of these healing cultures had a historical point of arrival in the city of Accra and Roberts tells the story of how they intertwined and how patients and healers worked together in their struggle against disease By focusing on the medical history of one place Roberts details how urban development colonization decolonization and independence brought new populations to the city where they shared their ideas about sickness and health *Sharing the Burden of Sickness* explores medical history during important periods in Accra s history Roberts not only introduces readers to a wide range of ideas about health but also charts a course for a thoroughly pluralistic culture of healing in the future especially with the spread of new epidemics of HIV AIDS and ebola

Montgomery,2019-01-21 The ramifications of the trans Saharan trans Atlantic Indian Ocean and domestic African slave trades are immeasurable and they continue to disaffect black people from Africa to Haiti and Los Angeles to Lagos *Shackled Sentiments* focuses on the memories and embodiments of slavery through case studies from western eastern and central Africa the Caribbean and Latin America The contributors to this collection examine the ways that memories of slavery have been internalized Slavery and memory are assessed from multiple perspectives as sets of ritual practices community based systems of spirit veneration mechanisms of resistance and national pride sacred languages informing personhood and instruments for healing and well being This book is recommended for scholars of anthropology history religion art and linguistics      **Beyond the state** Anna Greenwood,2015-12-01 This electronic version has been made available under a Creative Commons BY NC ND open access license The Colonial Medical Service was the personnel section of the Colonial Service employing the doctors who tended to the health of both the colonial staff and the local populations of the British Empire Although the Service represented the pinnacle of an elite government agency its reach in practice stretched far beyond the state with the members of the African service collaborating formally and informally with a range of other non governmental groups This collection of essays on the Colonial Medical Service of Africa

illustrates the diversity and active collaborations to be found in the untidy reality of government medical provision The authors present important case studies covering former British colonial dependencies in Africa including Kenya Malawi Nigeria Tanzania Uganda and Zanzibar They reveal many new insights into the enactments of colonial policy and the ways in which colonial doctors negotiated the day to day reality during the height of imperial rule in Africa The book provides essential reading for scholars and students of colonial history medical history and colonial administration Pathologies of the West Roland Littlewood,2002 Psychiatry conventionally regards spirit possession and dramatic healing rituals in non European societies as forms of abnormality if not mental illness Roland Littlewood a psychiatrist and social anthropologist argues that it is necessary to take into account both social process and personal cultural meaning when explaining psychiatric illness and deviant behavior Littlewood brings anthropological and psychiatric literature to bear on case studies of self poisoning agoraphobia hysteria chronic fatigue syndrome post traumatic stress male sexual violence and eating disorders He contends that Western psychiatric illnesses are themselves possession states patterns by which individual agency is displaced through an idiom of alien intrusion whether of a spirit or a disease Pathologies of the West is simultaneously an original approach to psychiatric illness in its international perspective and an introduction to recent developments in the social anthropology of medicine It examines critically the relevance of phenomenological structural and ethological approaches to understanding extreme personal experience Littlewood argues that anthropology must not simply provide a cultural alternative to sociological critiques of medicine psychiatry itself should take into account the ways in which cultural values are acted out by individuals **Understanding and Applying Medical Anthropology** Peter J.
