Most people who are familiar with the Painted Desert of northeastern Arizona know it only from having pulled off at the Petrified Forest exit on Interstate 40. If they happen to come by it at midday as most do, they find a landscape drained of color and flattened under the direct sunlight. But this remote pocket of the Arizona desert sandwiched between the Little Colorado River on one side and bold escarpments on the other is much more than most tourists ever experience. An ethereal landscape of sculpted rock, wind-fluted cliffs and elegantly drifting sand, the Painted Desert is a rich storehouse of natural beauty, colorful history and scientific wonders. Here the strongest winds in Arizona blow across extensive dunefields where less than ten inches of rain falls each year and only a few desert-savvy Navajo are able to live. Now for the first time, award-winning writer Scott Thybony and freelance photographer David Edwards offer an intimate look at a place that remains inhospitable and inaccessible to so many. They share insights about the geology, paleontology, anthropology and human history of the region as well as personal stories that dispel the misconceptions and mysteries that surround this delicate and difficult landscape. With fifteen stunning photographs gracing the text, this book offers a vibrant portrait of one of the Southwest's most barren and most colorful landscapes. Discover classic trails and beautiful areas of the state that many visitors miss from Glacier National Park's magnificent Going to the Sun Road in the northwest to the rugged rangelands and red-tinted badlands of eastern Montana. Along the way, you'll discover ghost towns, glaciers, hot springs and great hiking and wildlife viewing opportunities, a mere taste of what the Big Sky Country has to offer. Inside, you'll find itineraries ranging from 49 to 175 miles in length. Route maps for each drive. In-depth descriptions of attractions along the way. Optional side trips to museums, parks and landmarks. Tips on lodging, camping, dining, travel services and best driving seasons. Dinosaurs Rediscovered Don Lessem, 1993 From dinosaurs smaller than chickens to the biggest beasts ever to walk the Earth, here is the exciting story of recent discoveries about dinosaurs and the scientists who made them.
