Here are some solutions for removing stains from marble:

- Lukewarm water and ammonia: A mix of warm water and concentrated ammonia can help remove stains.
- Acetone: A solvent that can help lift oil-based stains like cooking oil, milk, or cosmetics.
- Rubbing alcohol: Can be mixed with a few drops of dish soap and water to treat light stains.
- Baking soda: Can be mixed with 3% hydrogen peroxide and a few drops of dish soap to treat stubborn stains.

You should avoid using Magic Erasers to clean marble surfaces because they can scratch the surface, dull the marble, and damage the sealant.

Since marble is a soft and porous stone, it can develop permanent stains that only a professional marble refinisher can remove.
