Science and the Search for God Gary A. Kowalski,2003 Harvard educated theologian Gary Kowalski argues that many of the ills of the modern world from the rise of fundamentalist intolerance to secular society's endless and empty search for thrills stem from the mistaken view that science and faith are antagonists rather than natural allies Both science and faith the author suggests compel us now to move beyond materialism toward an understanding of the world that includes the realities of consciousness and spirit In the twenty first century human beings have less reason than before to feel they hold a privileged or special position in the cosmos but more cause than ever to feel connected and akin to all that is Christians and Jews skeptics and seekers alike will find that this brief persuasively written volume sheds new light on the old questions Who are we Where do we figure in the larger scheme of things And what can we honestly believe **In Search of Our Ancient Ancestors** Anthony Adolph,2015-10-30 A top genealogist shows how genetics helps and how it roots each of us in this magnificent story of Life on Earth in the most meaningful way imaginable Reunite Magazine What a fine long pedigree you have given the human race Charles Darwin to Charles Lyell 1863 How distantly are we related to dinosaurs How much of your DNA came from Neanderthals How are the builders of Stonehenge connected to great grandpa According to science life first appeared on Earth about 3 500 million years ago Every living thing is descended from that first spark including all of us But if we trace a direct line down from those original life forms to ourselves what do we find What is the full story of our family tree over the past 3 500 million years and how are we able to trace ourselves so far back From single celled organisms to sea dwelling vertebrates amphibians to reptiles tiny mammals to primitive man the first Homo sapiens to the cave painters of Ice Age Europe and the first farmers down to the Norman Conquest this book charts not only the extraordinary story of our ancient ancestors but also our 40 000 year long quest to discover our roots from ancient origin myths of world shaping mammoths and great floods down to the scientific discovery of our descent from the Genetic Adam
