Lights Out T. S. Wiley, 2002-01-18 When it comes to obesity, diabetes, heart disease, cancer and depression everything you believe is a lie With research gleaned from the National Institutes of Health T S Wiley and Bent Formby deliver staggering findings Americans really are sick from being tired Diabetes, heart disease, cancer and depression are rising in our population We're literally dying for a good night's sleep Our lifestyle wasn't always this way It began with the invention of the lightbulb When we don't get enough sleep in sync with seasonal light exposure we fundamentally alter a balance of nature that has been programmed into our physiology since day one This delicate biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility and mental and physical health When we rely on artificial light to extend our day until 11 p.m. midnight and beyond we fool our bodies into living in a perpetual state of summer Anticipating the scarce food supply and forced inactivity of winter our bodies begin storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive Our own survival instinct honed over millennia is now killing us Wiley and Formby also reveal That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness and premature aging Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly Why the lifesaving information that can turn things around is one of the best kept secrets of our day *Lights Out* is one wake up call none of us can afford to miss **Dallas Cowboys**
