Federal Register ,2005 **God Plants a Garden** Buck Elder,2019-10-03 What in the world was God thinking when He began creation Have you ever wondered why God even wanted to create our world in the first place Have you ever thought about the decisions God had to make each day as He went through the creation process What did He have to do first How did God decide where to put His creation what He was going to include what each thing would look like what each thing would be named For whom did God make His creation What might it have been like if you had been there looking over God s shoulder and seeing the creation process unfold through His eyes God Plants a Garden takes a fresh look at the creation story and gives you the opportunity to imagine journeying with God through the creation process each day exploring some possible answers to these questions and to appreciate all that God must have had to do as He created His garden and perhaps even discover a different kind of love story along the way **Perspectives on Crazy Ex-Girlfriend** Amanda

Konkle,Charles Burnetts,2021-09-22 With an off putting title and a decidedly retrograde premise the CW dramedy Crazy Ex Girlfriend is a surprising choice for critical analysis But loyal viewers quickly came to appreciate the show s sharp cultural critique through masterful parody and this strategy has made it a critical darling and earned it several awards throughout its run In ways not often seen on traditional network television the show transcends conventional genre boundaries the Hollywood musical the romantic comedy the music video while resisting stereotypes associated with contemporary life The

essays in this collection underscore the show's ability to distinguish itself within the current television market. Focusing on themes of feminism, gender identity, and mental health, contributors explore the ways in which the show challenged viewer expectations as well as the role television critics play in identifying a show's authenticity or quality. *Report of the*

Raise 'low', Rethink 'high.' A Representation of the Academic Potential of So-Called 'Low' Culture Emma

Buchanan, 2020-11-15 Despite or more likely due to being the culture which most affects and interacts with the masses, the broad and definition-evading category of popular culture remains a second-class citizen in academia, relegated to a position of low below a culture deemed high and worthy of scholarly inquiry. This eclectic collection of essays aims to convince that this inequality must be addressed by exploring a variety of supposedly low cultural types and texts through an academic lens, proving that so-called low culture can be a valuable contribution to academic research. That said, raising the low does not mean making it high, turning it into an elite category to be accessed only by experts. Rather, the authors are unswerving in their approach that academic writing and fan writing are not mutually exclusive. On the contrary, it is their knowledge and passion as fans of their subject matter that has inspired their chapters, all of which draw upon their considerable experience of engaging as fans in what they discuss. All the chapters have been written by postgraduate students seeking to inspire a new empiricism through which their interests might be fully pursued in their futures as scholars. Emma Buchanan is a British postgraduate researcher and television fan who is currently writing up her PhD thesis on the topic of gender and change in AMC's *The Walking Dead* as understood from the point of view of Jungian depth psychology. Adapting Superman John

Darowski, 2021-05-29 Almost immediately after his first appearance in comic books in June 1938, Superman began to be adapted to other media. The subsequent decades have brought even more adaptations of the Man of Steel, his friends, family, and enemies in film, television, comic strip, radio novels, video games, and even a musical. The rapid adaptation of the Man of Steel occurred before the character and storyworld were fully developed on the comic book page, allowing the adaptations an unprecedented level of freedom and adaptability. The essays in this collection provide specific insight into the practice of adapting Superman from comic books to other media and cultural contexts through a variety of methods, including social, economic, and political contexts. Authors touch on subjects such as the different international receptions to the characters, the evolution of both Clark Kent's character and Superman's powers, the importance of the radio, how the adaptations interact with issues such as racism and Cold War paranoia, and the role of fan fiction in the franchise. By applying a wide range of critical approaches to adaptation and Superman, this collection offers new insights into our popular entertainment and our cultural history. **Technology-driven Supply Chain Management In Industrial 4.0 Era: Resilience, Responsiveness**

[Men-Tsee-Khang-འཇམ་དབྱངས་མཆོག་] English Editorial Board,2018-03-23 A Note from the Editor s Desk Dear fellow students It is a matter of immense joy for us to be able to bring out the XXIVth issue of our annual academic journal Gangri Langtso Gangri Langtso is a vitally important bilingual academic platform of our college for free and open intellectual discussions on various topics pertaining to Tibetan medicine Tibetan Astro Science and many other subjects It is also a common platform where we all can share our ideas thoughts dreams and memories in the form of any creative writings As English editors of this esteemed magazine we learned a lot of things from the experience and at the same time had quite a delightful and memorable year 2018 We hope the very same for you all the most respected teachers staffs and fellow students It was a privilege for us to go through your diligently written articles translations and poetry all of which are highly admirable and truly deserving much more appreciation We have published every single article that was submitted to us as we genuinely consider that even one paragraph written on one s own is so much worthwhile The benefits of writing essays or analytical articles are so much more than we know It is believed to be the best method of learning in not only remembering the textual information but also to stimulate our brain for critical and logical thinking which His Holiness the Dalai Lama always gives emphasis to Why writing is the best method of learning This is because we can write something on our own language if and only if we are convinced of the facts and we do not get convinced of facts by memorizations through repetition but by reasoning through analysis and logic Questions may be asked such as it will be very difficult to cultivate those qualities mentioned above anyway so why those skills and qualities are absolutely essential for us as future doctors and TASP s Our profession is deeply connected to wellbeing of other people having direct impacts on their lives Unlike western doctors who rely on many laboratory tests and machines our diagnoses and course of treatments have to be mainly based on our own critical thinking experience and intelligence Hence we must try to develop these skills as early as possible Even a slight fault in the diagnosis of a patient can cause loss of trust in our medical system Such is the magnitude of our responsibility Moreover if we allow ourselves to think in the lines of secure job from Men tsee khang and no need to bother beyond that I am surely not the right person to point out these facts but every single theory of education modern or traditional scholars and research on education policy says learning or educating for job and future security is wrong We blame modern education and modern medical practitioners with bombastic words like commercialized and no ethics but first even as students we

absolutely need to search within ourselves to make sure we are free from such blames How does human brain works as far as learning is concerned Exams are a necessity that we cannot do away with in today s world but studying for exams alone does not guarantee knowledge and skills that are needed in real life This is a challenge that every educators and students face today When we study only for an exam our brain naturally cannot commit those chunks of information into permanent memory because sub consciously we wanted our brain only to retrieve those pieces of information in few weeks during the exam So majority of people cannot retain 70 80% of the information one month after the exam if it was not revised regularly I would be more than glad if someone proved me that I am wrong However once we write an investigative article or a short piece on a certain topic in our own words we don t forget about it plus we gain additional perspectives on the topic In my humble opinion it is in our own advantage to study for life beyond exams As a fellow student I am optimistic that what I say here will be taken in a positive spirit We are living in an interesting time when the world is making leaps and bounds in the field of health science The diseases that were not curable before few decades are cured easily and preventive medicines even nullify the possibility of many diseases The research in stem cells and biotechnology is developing in such a rate that now doctors are taking steps in detecting the possibility of certain diseases in one s life through genetic information and correcting those faulty genes even before birth The scientists doctors and researchers spend their lifetimes solely for such breakthroughs needless to mention the billions of dollars spent In such a rapidly changing time we as Sowa Rigpa students all want to become great future healthcare providers This is undisputedly a great aspiration and even a noble one However just noble thoughts and flowery words will mean nothing if it is not translated into concrete action and obtained results While maintaining the integrity of our medical system if we as Sowa Rigpa practitioners were not able to keep up with the time our goal of providing people the best possible health service may not be materialized To highlight some of the things that happened in 2018 pertaining to Sowa Rigpa In July American chemistry society USA published a paper claiming the mercury level in Tibetan medicine is causing an environmental hazard in Tibet and China Unbiased analysts believe that it is nothing but another sham that Chinese government enacted because ACS clearly acknowledged that the funds came from the Chinese government and they merely published the paper on its website Since China cannot possibly deny the destruction and havoc brought on the third pole of the world for economic gains in an effort to mislead the world and wash their hands off they tried to blame the destruction of Tibetan environment to Tibetan medicine In the article itself it does not talk about the thorough process that is strictly followed to detoxify or tame it before using it in Tibetan medicines In another drama they added the medicinal bath therapy of Lum in UNESCO list as world intangible cultural heritage They on one hand want Sowa Rigpa to take the blames of environmental destruction and on the other hand want to claim full patent rights on Sowa Rigpa as China s intellectual property What more is unreasonable than this What can we do in the wake of such developments Last but not the least I would like to say thank you all who contributed your writings for this very important

platform Such journals are crucial part of educational curriculum Particularly in the traditional system of education three things are deemed indispensable namely lecture debate and composition Each one of them is equally important for a holistic quality education We believe publishing this journal is serving as a small part in fulfilling the requirements of composition In fact I don t need to emphasize more on the importance of learning through composition because Yuthok Yonten Gampo himself clearly stated in Gyueshi that the foundation to become a great physician is to excel in reading and composition in the 31st chapter of explanatory tantra Finally we thank Dr Namdol Lhamo la for proofreading the articles and sharing her insights with us We also thank you all very much for giving us this opportunity to serve as the English editor of this journal Our very limited experience and lack of proper knowledge in English language were the greatest obstacles to work in our best abilities Even so we are very happy to put our best efforts in this endeavor for we consider it an honor to have your trust and support May the merits of our collective efforts bear the fruits soon to free sentient beings from suffering We wish you all a very happy and meaningful academic year 2019 Yours Sincerely Thupten Palden

Tarnished Heroes, Charming Villains and Modern Monsters Lynnette Porter, 2014-01-10 The heroes villains and monsters portrayed in such popular science fiction television series as Heroes Lost Battlestar Galactica Caprica Doctor Who and Torchwood as well as Joss Whedon s many series illustrate a shift from traditional clearly defined characterizations toward much murkier definitions Traditional heroes give way to gray heroes who must become more like the villains or monsters they face if they are going to successfully save society This book examines the ambiguous heroes and villains focusing on these characters different perspectives on morality and their roles within society Appendices include production details for each series descriptions and summaries of pivotal episodes and a list of selected texts for classroom use Instructors considering this book for use in a course may request an examination copy here
