Seattle 1900-1920 Richard C. Berner, 1991 **How Many Machine Guns Does It Take to Cook One Meal?** Victoria Johnson, 2011-10-01 How Many Machine Guns Does It Take to Cook One Meal explores the cultural forces that shaped two pivotal events affecting the entire West Coast the 1919 Seattle General Strike and the 1934 San Francisco General Strike In contrast to traditional approaches that downplay culture or focus on the role of socialists or communists Victoria Johnson shows how strike participants were inspired by distinctly American notions of workplace democracy that can be traced back to the political philosophies of Thomas Jefferson and Thomas Paine Johnson examines the powerful stories and practices from our own egalitarian traditions that resonated with these workers and that have too often been dismissed by observers of the American labor movement Ultimately she argues that organized labor's failure to draw on these traditions in later decades contributed to its decreasing capacity to mobilize workers as well as to the increasing conservatism of American political culture This book will appeal to scholars of western and labor history sociology and political science as well as to anyone interested in the intersection of labor and culture

Women and Nature Glenda Riley, 1999-01-01 Long before Rachel Carson's fight against pesticides placed female environmental activists in the national spotlight women were involved in American environmentalism In Women and Nature Saving the Wild West Glenda Riley calls for a reappraisal of the roots of the American conservation movement This thoroughly researched study of women conservationists provides a needed corrective to the male dominated historiography of environmental studies The early conservation movement gained much from women's widespread involvement Florence Merriam Bailey classified the birds of New Mexico and encouraged appreciation of nature and concern for environmental problems Ornithologist Margaret Morse Nice published widely on Oklahoma birds In 1902 Mary Knight Britton established the Wild Flower Preservation Society of America Women also stimulated economic endeavors related to environmental concerns including nature writing and photography health spas and resorts and outdoor clothing and equipment From botanists birders and nature writers to club women and travelers untold numbers of women have contributed to the groundswell of support for environmentalism

American Far West in the Twentieth Century Earl S. Pomeroy, 2008-10-21 In this richly insightful survey that represents the culmination of decades of research a leading western specialist argues that the unique history of the American West did not end in the year 1900 as is commonly assumed but was shaped as much if not more by events and innovations in the twentieth century Earl Pomeroy gathers copious information on economic political

social intellectual and business issues thoughtfully evaluates it and draws a new and more nuanced portrait of the West than has ever been depicted before Pomeroy mines extensive published and unpublished sources to show how the post 1900 West charted a path that was influenced by but separate from the rest of the country and the world He deals not only with the West's transition from an agricultural to an urban region but also with the important contributions of minority racial and ethnic groups and women in that transformation Pomeroy describes a modern West increasingly urban transnational and multicultural that has overcome much of the isolation that challenged it at an earlier time His final book is nothing short of the definitive source on that West

Race, Radicalism, Religion, and Restriction Kristofer Allersfeldt, 2003-03-30 In 1924 America passed legislation that effectively outlined which immigrants were to be considered beneficial to the national body and which were not Albert Johnson a Washington State Congressman sponsored the Act This study examines the role of the Pacific Northwest in the change of national sentiment that led up to this legislation Throughout the period this region experienced massive growth in its immigrant population Its forests and small towns were the scenes of many clashes with the alien radicals resulting in the creation of anti Catholic legislation and the laws against land ownership by the Japanese Analyzing issues of race religion and political radicalism Allersfeldt determines that the region was highly influential in the national debate Most immigration studies of this era focus on the East Coast or on California but Allersfeldt finds that Northwestern politicians and populists responding to regional events as much as national sentiments often set the national immigration agenda Diverse organizations such as the APA the Ku Klux Klan and the IWW gained powerful local support and had significant influence on the region's attitudes towards immigrants Rather than following California's lead in the opposition to Asian immigration the Northwest actually set the path for its southern neighbor in many important aspects

establish who was the better man David Peterson del Mar accounts for the social relations of power that lie behind this intimate form of violence this white noise that has always been with us humming quietly between more explosive acts of violence Broad in its chronological and cultural sweep Beaten Down examines interpersonal violence in Washington Oregon and British Columbia beginning with Native American cultures before colonization and continuing into the mid twentieth century It contrasts the disparate ways of practicing and punishing interpersonal violence on each side of the U S Canadian border Del Mar concludes that we cannot comprehend the causes and moral consequences of a violent act without considering larger social relations of power whether between colonizers and original inhabitants between spouses between parents and children or between and among different ethnic groups The author has drawn on a vast array of vivid sources including newspaper accounts autobiographies novels oral histories historical and ethnographic publications and hundreds of detailed court cases to account for not only the relative frequency of different forms of violence but also the shifting definitions and perceptions of what constitutes violence This is a thoughtful and probing account of how and why people have hit each other and the manner in which opinion makers and ordinary citizens have censured defended or celebrated such acts Del Mar s conclusions have important implications for an understanding of violence and perceptions of violence in contemporary society
