**New World, Inc.** John Butman, Simon Targett, 2025-04-08 Three generations of English merchant adventurers not the Pilgrims as we have so long believed were the earliest founders of America Profit not piety was their primary motive Some seventy years before the Mayflower sailed a small group of English merchants formed The Mysterie Company and Fellowship of Merchant Adventurers for the Discovery of Regions Dominions Islands and Places Unknown the world s first joint stock company Back

then in the mid sixteenth century England was a small and relatively insignificant kingdom on the periphery of Europe and it had begun to face a daunting array of social commercial and political problems Struggling with a single export woolen cloth the merchants were forced to seek new markets and trading partners especially as political discord followed the straitened circumstances in which so many English people found themselves At first they headed east and dreamed of Cathay China with its silks and exotic luxuries Eventually they turned west and so began a new chapter in world history The work of reaching the New World required the very latest in navigational science as well as an extraordinary appetite for risk As this absorbing account shows innovation and risk taking were at the heart of the settlement of America as was the profit motive Trade and business drove English interest in America and determined what happened once their ships reached the New World The result of extensive archival work and a bold interpretation of the historical record New World Inc draws a portrait of life in London on the Atlantic and across the New World that offers a fresh analysis of the founding of American history In the tradition of the best works of history that make us reconsider the past and better understand the present Butman and Targett examine the enterprising spirit that inspired European settlement of America and established a national culture of entrepreneurship and innovation that continues to this day
