Sebastiano Serlio On Architecture:

Sebastiano Serlio on Architecture Sebastiano Serlio, 1996 Few Renaissance theorists have influenced the development of western architecture as much as Sebastiano Serlio 1475 1554 The collection of books which represents his lifetime s work was to become invaluable to the majority of northern European architects who never having seen Rome none the less marvelled at Italian antiquities Hence when Christopher Wren designed St Paul s cathedral and when John Wood designed the streets of Bath both architects had Serlio's books to hand On his death Serlio had published the first five volumes of the planned seven book treatise and had witnessed their enormous popularity especially amongst the many patrons and architects eager to emulate the splendours of antiquity and of Italian courts which sought her renaissance Serlio's treatise begins with the rules of geometry and perspective described in books one and two respectively knowledge of which formed the traditional preserve of the painter Serlio's beautiful woodcut illustrations in book three record the Golden Age of the Roman Empire her Baths Temples Palaces and Arches whilst his text in book four outlines the rules for designing modern elements ranging from fireplaces to facades based on these monuments To the Tuscan Doric Ionic and Corinthian columns which had been discussed by the Roman author Vitruvius and the great quattrocento philosopher architect Leon Battista Alberti Serlio added the Composite and thereby established a canon of five Orders which held authority for over a century The fifth book illustrates the use of these Orders in twelve temple designs of his own invention This translation of Serlio s first five books by Vaughan Hart and Peter Hicks replaces the only other English version that produced in 1611 by Robert Peake whose source was not the original Italian but a corrupt Dutch translation As such this is the first English translation of Serlio s work to be based on his own editions and the first collection in any language of all five books taken from Serlio s corrected originals It represents a major step in the recognition of Sebastiano Serlio as the most important architectural writer of the sixteenth century Sebastiano Serlio on Architecture Sebastiano Serlio,1996 Sebastiano Serlio on Architecture: Books VI-VII of 'Tutte l'opere d'architettura et prospetiva' with 'Castrametation of the Romans' and 'The Extraordinary book of doors' Sebastiano Serlio, 1996-01-01 Sebastiano Serlio was the most important architectural writer and theorist of the sixteenth century. The author of the first wide ranging illustrated book on architecture he produced a complete set of model designs as well as practical solutions for everyday design problems This volume the second in a two volume series of Serlio s entire works presents the previously unpublished sixth book the seventh book and as well as The Extraordinary Book of Doors his little known Castrametation of the Romans each of which demonstrates Serlio s sophisticated design theories This is the first translation of Serlio's later works and the first time that the long lost sixth volume has been united with its companion works and restored to its intended position The book also includes an introduction and notes by translators Vaughan Hart and Peter Hicks that demonstrate Serlio's significance within the history of architecture and the importance of these neglected texts to our understanding of Serlio's work Sebastiano Serlio on
