Lander, 2009 *Better Regulation* Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union **Legislative Calendar** United States. an essential element in the regulation of current financial reporting Standard setters promulgate such standards and companies and professional accountants follow them in preparing financial reports Although much has been written about the history of standard setting the conceptual underpinnings of accounting standards the process of setting them and whether such standards should be rules based or principles based there has been little written about the kind of thing they are This book examines the nature of accounting standards and the very idea of a rule of implementation guidance and of the objectives that are included in them It enables the reader to grasp the reasons for promulgating standards the role of the conceptual framework in setting standards in an institutional context and the kind of rules that are useful in regulating financial reporting The insights provided by this examination are used to throw light on the distinction between principles based and rules based standards and on the nature of good accounting standards
