## **Losing Your Job Reclaiming Your Soul Stories Of Resilience Renewal And Hope:**

Losing Your Job--reclaiming Your Soul Mary Lynn Pulley, 2010 Pulley describes the Great Recession that started in 2008 as part of The Third Wave described by Alvin Toffler 1980 The First Wave was the shift to an agrarian society 10 000 years ago The Second Wave was the Industrial Revolution that began in the 19th century The Third Wave marks The Information Age and changes everything about the world of work As millions of unemployed people can attest the job as we knew it is a fading concept In this book Pulley tells stories of people who suffered a job loss but bounced back to create more satisfying lives Their stories are meant to serve as examples and inspiration *Losing Your Job—Reclaiming Your Soul* Mary Lynn Pulley, 1997-06-26 Even job loss has a silver lining A truly wonderful book Through stories myths and metaphors Mary Lynn Pulley examines the factors which help people develop more meaning in their work and their lives This book is not only for those going through career transitions but for all of us who want to be more resilient in today's work world Betsy A Collard Career Action Center Right sizing Reengineering Organizational restructuring No matter the corporate euphemism in which it's couched the loss of a job remains one of the most devastating events a person can encounter But some are finding it to be a blessing in disguise In *Losing Your Job Reclaiming Your Soul* Mary Lynn Pulley presents a positive practical and empowering new model of career resilience for everyone who has lost fears losing or is thinking of leaving his or her job Here are the results of dozens of interviews with high performing professionals who bounced back from the trauma of involuntary job loss Their stories provide powerful real world lessons in flexibility determination and fulfillment It's a book that puts the prospect of job loss in meaningful perspective and gives us insight into how to turn one of life's most catastrophic experiences into a wellspring of personal and professional reawakening *Zen and the Art of Making a Living* Laurence G. Boldt, 1999-05-01 The most innovative unconventional and profoundly practical career guide available newly revised and updated With today's economic uncertainties millions of Americans realize they must seize control over their own career paths They want work that not only pays the bills but also allows them to pursue their real passions In this revised edition Laurence Boldt updates and revises his revolutionary guide to meet the challenges of the twenty first century workplace The first part of this book helps readers to identify the work that they really want to do while the second provides practical active steps to finding or creating that work *Zen and the Art of Making a Living* goes beyond inspiration providing a proven formula for bringing creativity dignity and meaning to every aspect of the work experience **Building Resiliency** Center for Creative Leadership (CCL), Mary Lynn Pulley, Michael Wakefield, 2011-08-15 It may be human nature to resist change particularly when it's delivered as a hardship disappointment or rejection But by developing resiliency managers can not only survive change but also learn grow and thrive in it In fact for leaders developing resiliency is critical Resiliency helps managers deal with the pressures and uncertainties of being in charge in organizations today This guidebook defines resiliency explains why it's important and describes how you can develop your own store of resiliency It focuses on nine

developmental components that taken together create a sense of resiliency and increase your ability to handle the unknown and to view change whether from disappointment or success as an opportunity for development

**The Center for Creative Leadership Handbook of Leadership Development** Cynthia D. McCauley, Ellen Van Velsor, 2004-01-16 The Center for Creative Leadership CCL is the world's largest institution devoted exclusively to leadership research and education For more than three decades CCL has studied and trained hundreds of thousands of executives and worked with them to create practical models, tools and publications for the development of effective leaders and leadership This second edition of The Center for Creative Leadership Handbook of Leadership Development brings together the wealth of practical knowledge that CCL has gained from this experience It explores the essence of leadership development, reveals how individuals can effectively enhance their leadership skills and demonstrates what organizations can do to help build leaders and leadership capacity The book also includes a companion CD ROM that contains a library of classic CCL publications for practicing leaders

**Handbook of Online Learning** Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute's focus on human and organizational behaviour, educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well-crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there's a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e.g. lectures, textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors' primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re-examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re-thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment

pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute's 26 years of teaching in nontraditional distributed learning environments **The CCL Handbook of Coaching** Sharon Ting, Peter Scisco, 2012-06-14 Coaching is vital to developing talent in organizations and it is an essential capability of effective leaders The CCL Handbook of Coaching is based on a philosophy of leadership development that the Center for Creative Leadership has honed over thirty years with rigorous research and with long rich experience in the practice of leadership coaching The book uses a coaching framework to give a compass to leaders who are called to coach as a means of building sustainability and boosting performance in their organizations The book explores the special considerations that leader coaches need to account for when coaching across differences and in special circumstances describes advanced coaching techniques and examines the systemic issues that arise when coaching moves from a one to one relationship to a developmental culture that embraces entire organizations **Leading with Authenticity in Times of Transition** Kerry A. Bunker, Michael Wakefield, 2005 Organizations today are awash in change Managing change requires leaders to focus simultaneously on managing the business and providing effective leadership to the people More often than not it is the focus on the people side that loses out This book offers a framework for understanding the issues and competencies that contribute to effective leadership during times of change Its purpose is to help leaders determine how to choose and move among a variety of managerial approaches to help them see what's working what's not working and what's missing In this way leaders can more clearly assess their impact and learn how to meet the demands of both managing the business and leading the people

**Evaluating the Impact of Leadership Development** Jennifer Martineau, Kelly Hannum, 2004 Approaching issues from an evaluative perspective enables leadership development professionals to consider multiple perspectives and draw lessons as a natural part of the way work is done **Vocational Psychological and Organisational Perspectives on Career**, 2009-01-01 It has long been lamented that although several disciplines contribute to career scholarship they work in isolation from one another thus denying career theory research and practice the benefits that multidisciplinary collaboration would bring This constitutes a lost opportunity at a time when new understandings and approaches are needed in order to respond effectively to global changes in society and work This book takes a major step towards remedying this situation by bringing together two key perspectives on career the vocational psychological and the organisational interpreted broadly to include organisation behaviour and human resource management Written by international experts the book opens by identifying some of the tributaries that flow into the great delta of careers scholarship and noting the need to link what are at present separate islands of scholarship It is structured to allow comparison between the ways in which the two perspectives address career development and career management theory research and interventions It concludes by pointing to the

possibilities for dialogue and even collaboration between these perspectives and suggesting ways in which these could be brought about The book will be essential reading for career scholars because with its potential to stimulate new thinking and developments in theory and research and also importantly in practice with beneficial spin offs for policy makers this dialogue could open a new phase in career scholarship With its overviews of the history theory research and practice of both perspectives the book will also be a valuable resource for students of both perspectives Business □□□□□□□□,2003
