Loss and Found Gary Young, Kathy Young, 2002-01 An uplifting must read in the most neglected area of self help for the seven million young widows and widowers in this country their families friends counselors clergy and more Young widowhood is maddening sad funny confusing enlightening liberating surprising frustrating supernatural sexless sexy Honest and detailed from both the male and female perspective Not a sitcom Its real Heres real help *Loss, Survive, Thrive* Meryl Hershey Beck, 2019-11-22 No one is prepared for the loss of a child No one It feels completely unnatural for children to predecease their parents Although it is not widely known each year there are over 135 000 under 40 year old deaths in the U S alone And according to one study 19% of parents outlive their children often carrying the weight of horrendous grief to their own graves Isolated and alone is how parents often describe the grief process Well meaning friends and family members usually rush to their side in the beginning Once the floral arrangements have wilted and the dinners from caring friends diminish there isn t really much that can be said to bring comfort to a suffering parent especially if those friends haven t experienced it themselves Unfortunately when these caring friends do bring up the loss quite often they say the wrong things Loss Survive Thrive offers a lifeline of hope Each chapter is an inspirational story written by a parent who also experienced the agony of losing a child reclaimed his her vitality and is now living a fulfilling life Every story is authentic and heartfelt designed to uplift and inspire The collective authors reach out through the pages to virtually hold hands with those who are suffering We the contributors have all been there We know their pain and we know about survival And now through our stories we offer comfort and support in helping them get through the toughest time of their lives Bereaved parents share an unspeakable bond And Loss Survive Thrive imparts insight from what s likely the only voices that grieving parents can hear others who have walked in their shoes This book is a giant step toward healing the grieving heart Treating Traumatic Loss Alyssa A Rheingold, Joah L. Coping With Loss Susan Nolen-Hoeksema, Judith Larson, Judith M. Larson, 2013-01-11 Coping With Loss describes the many ways in which people cope with the death of someone they love Most earlier books on bereavement have fallen into two categories distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies Each category is valuable but has tended to serve a narrow group of readers practitioners with particular theoretical orientations or researchers in quest of the latest findings Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention this book is different The authors weave together the strands of theory research and clinical wisdom into a seamless and readable narrative While they discuss previous work they also present new data never before published from one of the largest studies of bereaved people ever conducted the Bereavement Coping Project Unlike most studies to date which focused on only one type of bereaved group usually widows or widowers the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death The groups included those who had lost a spouse a parent an adult sibling or a child and those who had lost their significant other to cancer or cardiovascular disease on one hand as opposed to the stigmatized disease of AIDS on the other The book begins with a critical overview of theories of bereavement succeeding chapters explore in depth the impact of specific types of loss the impact of particular coping strategies on recovery the impact of social supports and religion and the special cases of children and of people who seem to grow and change for the better after a loss A final chapter considers implications for intervention with bereaved people Each chapter is richly illuminated with real life examples throughout and ends with a section called Voices in which bereaved people describe their various attempts to cope in their own words Insightful and informative
